

The top half of the image features a background of five lightbulbs hanging from above. The lightbulbs are arranged in a staggered pattern. The background color transitions from a dark teal on the left to a warm orange on the right. A network of white lines and dots is overlaid on the right side, suggesting a technical or digital theme. In the top left corner, there is a green square containing the EAGE logo and its full name.

GENERAL INFORMATION

EAGE

The European Association of Geoscientists and Engineers (EAGE) is a global professional, non-profit association for geoscientists and engineers with 19.000 members worldwide. The objective is to collect and distribute technical knowledge. EAGE organizes events and publishes a monthly magazine for its members and 5 scientific journals. All members of EAGE are professionally involved in (or studying) geophysics, petroleum exploration, geology, reservoir engineering, mining and mineral exploration, civil engineering, tunneling and environmental matters. EAGE's head office is located in the Netherlands with regional offices in Moscow, Dubai, Kuala Lumpur and Bogota.

ABOUT THE WORKSHOP

The value of passive seismic data is measured by its capacity to impact business critical decisions. Although passive seismic data have been used extensively for these purposes, often the decision makers receive mixed messages from their technical experts on the validity and accuracy of processing and interpretation results from their passive seismic projects. This workshop focuses on topics and solutions that have a direct impact on the cost-effectiveness and value-add of passive seismicity.

We invite presentations on a broad range of topics, covering novel methods (both processing and instrumentation), as well as applications to satisfy regulatory needs. Processing standards and comparability of results across the industry is currently seen by many as an obstacle to progress in the use of passive seismic monitoring technologies and their application. We therefore invite contributions to stimulate discussion on how to achieve processing and reporting standards across different industries (geothermal, hydraulic fracture stimulations, reservoir monitoring, and mining to name a few applications).

This highly interactive workshop brings together some of the leading experts in the fields of planning, acquisition, processing and interpretation of passive seismicity and allows the participants to identify specific solutions for current problems in the application of passive seismic data. Interactive poster-sessions and round-table discussion groups provide a unique opportunity to network and discuss how to advance the technology.

SPONSORING OPPORTUNITIES

With an array of unique promotional opportunities, we can help you design the perfect programme to enhance your company's experience at the Eighth EAGE Workshop on Passive Seismic. The Main Sponsor Programme exposes attendees and businesses to your company and promotes your presence within the industry.

EAGE strives to realize recognition, long term exposure, benefits and publicity for companies that sponsor EAGE workshops.

WHY BECOME A SPONSOR

When you are a corporate sponsor you get high visibility in a qualitative and uncluttered environment that makes your message stand out. EAGE is synonymous with quality, with proven track records in the past. The workshop programme offers a diverse menu that will help you reach your target audience.

Sponsoring will enable you to:

- Increase your visibility to a national, regional and international audience
- Enhance your corporate image
- Reach an influential and exclusive audience
- Break through the media clutter
- Associate your company with EAGE – World's truly multi-disciplinary geosciences society

Please note that sponsoring opportunities are not restricted to packages in this guide. We would be delighted to explore ideas to fit your budget.
