

WORLD ENDO 2026 ABSTRACT CATEGORIES

1. Clinical Practice & Quality in Endoscopy

- Diagnostic gastroscopy and quality indicators
- Colonoscopy, bowel preparation, and quality indicators
- Documentation, reporting, and training
- Sedation, patient safety, and quality of care
- Complications and adverse events
- Guidelines, standards, and quality indicators

2. Emergency Endoscopy & Endoscopic Therapy

- Endoscopic haemostasis in upper GI bleeding
- Endoscopic haemostasis in lower GI bleeding
- Foreign body removal
- Endoscopic dilatation of luminal stricture
- Percutaneous endoscopic gastrostomy/jejunostomy

3. Colonoscopy

- Colorectal cancer detection and screening
- Polypectomy, CSP, EMR, ESD, advanced resection
- Colitis, IBD-related lesions, and miscellaneous disorders
- Anorectal disorders (haemorrhoids, anal diseases)

4. Endoscopic Ultrasound (EUS)

- EUS diagnostics (GI, pancreatobiliary, gallbladder, others)
- EUS-guided tissue acquisition (FNA/FNB)
- Interventional EUS (pancreas, biliary, gallbladder, vascular, others)
- Portal hypertension and liver-related interventions
- New technology and innovations in EUS
- EUS-ERCP interface

5. ERCP: Biliary & Pancreatic Diseases

- Biliary stones and clearance strategies
- Benign biliary strictures
- Malignant biliary strictures and neoplasia
- Other biliary interventions
- Acute and chronic pancreatitis management
- Pancreatic strictures and neoplasia
- Congenital anomalies (pancreas divisum, others)
- Complications and outcomes

6. Cholangioscopy

- Diagnostic cholangioscopy
- Therapeutic cholangioscopy

7. Third Space Endoscopy/Advanced Endoscopic Procedures

- EMR, ESD, and related resection techniques
- POEM and other third-space endoscopy procedures
- NOTES and hybrid endoscopic–laparoscopic procedures
- Endoscopic bariatric and metabolic interventions
- Robotics, digital health, and tele-endoscopy
- Novel devices and technologies

8. Advanced Imaging

- Virtual chromoendoscopy (NBI, LCI, BLI, i-Scan, TXI)
- High-definition and magnification endoscopy
- Confocal laser endomicroscopy / Endocytoscopy
- Dye-based chromoendoscopy
- Emerging/novel imaging modalities

9. Artificial Intelligence in Endoscopy

- AI in upper GI (oesophagus, stomach, small intestine)
- AI in lower GI (colorectum)
- AI in pancreatobiliary and EUS
- AI applications beyond detection/diagnosis (workflow, training, quality)

10. Oesophageal Disorders

- Barrett's esophagus and neoplasia
- Squamous cell carcinoma and other malignancies
- GORD and anti-reflux interventions
- Other functional oesophageal disorders
- Ablation and advanced therapeutic techniques

11. Stomach and Small Bowel

- Gastric disorders (H. pylori, peptic ulcer disease, benign diseases)
- Gastric and small bowel neoplasia
- Functional/motility disorders
- Coeliac disease
- Inflammatory bowel diseases of the upper GI tract
- Capsule endoscopy
- Device-assisted enteroscopy

12. Hepato-Pancreato-Biliary Diseases (Non-ERCP/EUS)

- Pancreatic disorders (non-ERCP/EUS endoscopic management)
- Biliary tract disorders
- Liver diseases

- Standards of practice

13. Paediatric Endoscopy

- Diagnostic paediatric endoscopy
- Therapeutic paediatric endoscopy

14. Surgery

- Acute care
- Trauma
- Endocrine
- Breast
