

Inmaculada Peñas is a policy officer in the Unit Combatting diseases of the Directorate General of Research and Innovation at the European Commission. She is a veterinary trained to protect the human health. Before joining DG RTD, she worked in the Spanish Ministry of Agriculture in Madrid and in the Food and Agriculture Organisation in Rome. She has long experience in planning and implementing several EU Research and Innovation framework programmes. In particular, she has worked in designing the Marie Skłodowska Curie actions. In addition, she has been managing for several years the malaria research portfolio. Since 2017, she is the person in charge of the contribution of the European Union to the European and Developing Countries Clinical Trials Partnership (EDCTP), where 14 European countries, 16 African countries and the European Union are joining forces to accelerate the development of medical interventions to fight infectious diseases in sub-Saharan Africa.
