

Global Network of Donor Centers

Your Research Doesn't Have to Wait!

Our donor centers provide same-day, fresh material to support your time-sensitive research needs.*

Fast Facts

- Over 25,000 donors seen each year
- Delivering same day, fresh material to the Mid-Atlantic, Boston, San Francisco and London areas
- Access to over 400 recallable HLA-typed donors. Ability to leverage clinical network to expand donor collection capabilities

Fresh Material Solutions

Blood Products/Blood-Derived Biofluids

Whole blood, plasma, sera, bone marrow and more

LEUKOMAX® Leukopak

Normal and mobilized

Biofluids/Non-Blood Derived Biofluids

Urine, feces, saliva, sputum, semen, and more

Buffy Coat/Red Blood Cells

Enriched white and red blood cells

Cellular Solutions

PBMCs

Mixed lymphocyte & monocyte population

CD34+ Hematopoietic Stem Cells

Bone Marrow Mononuclear Cells (BMMC), Cord Blood Mononuclear Cells (CBMC)

Purified Cell Subsets

T Cells, B Cells, NK Cells, Monocytes & more

Our team of cell isolation experts perform rigorous QC testing to ensure reproducible results and eliminate upstream variability.

A Variety of Fresh Products

Products Offered	Boston, MA	Philadelphia, PA	Johnson City, TN	Memphis, TN	Berkeley, CA	Carlsbad, CA	London, UK
Blood Products	X	X	X	X	X	X	X
Biofluids (non-blood-derived)	X	X	X	X	X	X	X
Leukopaks	X	X	X		X	X	X
Cellular Solutions	X	X	X		X		X
Bone Marrow			X		X		

*Same-day delivery to clients within large geographic regions of PA, TN, MA, CA the UK and EU.

North America, Asia Pacific, Middle East & Africa

Cell and Gene Therapy Research Solutions

Fit for Your Applications

Our ability to provide fresh material within hours of collection means our products are suitable for a wide range of applications, including:

- Neutrophil Activation Assays
- Flow Cytometry Assays
- Cytokine and Chemokine Cell-Based Assay
- Cytokine Release Assays
- Platelet and Coagulation Function Assays
- Interferon Gamma Release
- Monocyte Activation Test
- ELISPOT

Validate Your Point of Care Device at Any of Our Ten Donor Centers

We now offer point of care (POC) device testing services. By optimizing our donor cohorts to match your device, we'll complete the testing quickly and efficiently.

Let Us Help Complete Your Phase IV Vaccine Efficacy Studies

BioIVT can specifically recruit donors for your Phase IV vaccine efficacy studies, with pre- and post-collection capabilities. That allows us to customize the donor pool, collection protocols and collection time points to your specific needs. We collect and process whole blood, sera and plasma, as well as non-blood derived collections such as urine, feces, saliva and more.

Setting the Standard for Ethical Collections

The BioIVT Regulatory and Quality Team follows rigorous quality processes conducted in accordance with applicable laws, regulations and ordinances. With each sample of data, you receive a Certificate of Analysis, along with donor and material information, depending on your order.

Feel confident in BioIVT!

- Biospecimens procured through ethical means
- IRB-approved protocols followed at all sites
- A superior track record for regulatory audits
- A trusted team of experts in place to navigate regulatory requirements
