

SERVICE AND REPAIRS

Verulam Scientific have a team of fully trained engineers to advise and support our customers throughout the UK and Ireland. We offer a range of maintenance plans and repair service on most makes and models of HPLC equipment. This includes support for bespoke systems where the component modules are from a variety of manufacturers built to perform a specialised application.

In addition to our current product portfolio, Verulam Scientific are the sole appointed service providers for Teledyne Isco flash chromatography systems and syringe pumps in the UK. Additionally we are fully trained by CTC Analytics on PAL legacy, XT and PAL 3 autosampler units and have over 20 years' experience working with the PAL range in all its various configurations. We stock a full range of spares, syringes and many accessories for these and other systems.

Verulam Scientific offer a range of service plans on all the equipment we supply and our engineers are trained and supported by the manufacturers we represent. With a fast response and fully equipped spares kits we can ensure a quick and thorough service is provided.

WHY CHOOSE US?

Verulam Scientific Ltd is a supplier of analytical instrumentation providing innovative solutions to the UK clinical, pharmaceutical, food, environmental, and biotechnology markets.

With specialisms in chromatography, electrochemistry, MALDI imaging, and laboratory automation, we offer customised solutions for many applications. We are extremely proud to be the UK distributors for a number of highly reputable European and US manufacturers, including: Antec Scientific; KNAUER; LCTech; HTX Technologies; SETonic; Hudson Robotics; Axel Semrau; Bertin Instruments.

We strive to offer customisable solutions across our portfolio of products, whether this is an individual module or complete systems or workcells. Each will be tailored to your specific needs and fully supported by our technical team.

We offer a range of service packages and can complement this with reagents, spares, and consumables to support many laboratory requirements. Our experienced team of service engineers, technical sales specialists, and support staff ensure our customers have the confidence that all queries will be dealt with promptly and effectively, no matter how small.

Contact us today, we are here to help.

“Our goal is to bring new and innovative products to UK laboratories”

ABOUT US

Verulam Scientific Ltd is an analytical instrument company providing innovative solutions and emerging technologies to the UK pharmaceutical, environmental, life science, food, clinical and biotechnology markets.

Verulam Scientific Ltd was named after the Roman city of Verulamium later known as St. Albans in which it was originally based. The company was founded in 2009 by Ken Rirsch, the present managing director, and has steadily grown from a small service group to a leading supplier of innovative analytical equipment and services.

After moving to new centrally located premises in Haynes near Bedford in 2017, Verulam Scientific has built a strong team of highly qualified industry professionals to serve customers throughout the UK. Fully supported by manufacturer suppliers throughout the world, Verulam are continuously introducing new technology to many areas of the analytical laboratory market.
