

Sterile Filtration *You Trust*

The Life Science business
of Merck operates as
MilliporeSigma in the
U.S. and Canada.

Millipore®

Preparation, Separation,
Filtration & Monitoring Products

Millipore® – the name you trust for sterile filtration

Millipore® is the brand of choice for sterile filters—for everything from media preparation for your cell culture, to sterilization of critical drug compounds:

Selection

From 1 mL to 20 L, we offer an array of both vacuum- and pressure-driven devices that incorporate our long-trusted membrane technology.

Expertise

With over 50 years of expertise in the sterile filtration business, we set the industry standard for high performance membrane technology and application in sterile filtration.

Innovation

As protocols requiring sterile filtration evolve, we continually qualify our filter systems to provide application-specific data.

Improving on Sustainability

We are proud to introduce Stericup® E and Steritop® E sterile filtration devices, designed to ensure trouble-free cell culture, while diminishing environmental impact. Groundbreaking device design maintains exceptional Stericup® filtration while dramatically reducing the use of disposable plastic and packaging materials. (see p. 8)

Membrane Technology

Sterile filtration performance depends on the quality of the membranes used. Our Millipore Express® PLUS, Durapore®, MF-Millipore™ and Fluoropore™ brand membranes set the industry standard for their application-specific properties (see below).

Fit-for-Application Membrane Chemistries

- Fastest flow, low protein-binding of aqueous solutions with Millipore Express® and Express® PLUS polyethersulfone (PES) membrane devices
- Fast flow and low protein-binding Mixed Cellulose Esters (MCE)
- Broad chemical compatibility and very low protein-binding polyvinylidene fluoride (PVDF)

What people are saying...

“For over 40 years we’ve trusted MilliporeSigma to provide the quality filtration tools we need.”

James T. Voss, NRRPT, CHP Fellow, Health Physics Society, President of Voss Associates.

“Trusted partners like MilliporeSigma are rare but central to our success.”

Dr. Michael West, CEO, BioTime, Inc., Renowned thought leader in stem cell therapeutics

Summary of Sterile Filtration Products

Vacuum filtration devices for cell culture media preparation

Description	Pore Size (µm)	Membrane	Maximum Process Volume	
Stericup® Quick Release Filtration	0.1 0.22 0.45	Millipore Express® PLUS (PES), Durapore® (PVDF)	150 mL 250 mL 500 mL 1000 mL	
Steritop® Quick Release Bottle-Top Filtration Units	0.1 0.22	Millipore Express® PLUS (PES), Durapore (PVDF)	150 mL 250 mL 500 mL 1000 mL	
 Stericup® E Eco-Friendly Filtration Units	0.22	Millipore Express® PLUS (PES)	500 mL 1000 mL	
 Steritop® E Eco-Friendly Bottle-Top Filtration Units	0.22	Millipore Express® PLUS (PES)	All Volumes	
Steriflip® Filtration Units	0.22 0.45	Millipore Express® PLUS (PES), Durapore® (PVDF), Nylon Net	50 mL	
Click Seal Receiver Bottles and Caps			100 mL 250 mL 500 mL	

Sterile syringe filters for cell culture media preparation and small volume filtration

Description	Pore Size (µm)	Membrane	Maximum Process Volume	
Millex® Syringe Filters (4, 13, 25 mm)	0.2 0.22 0.45 0.5	Millipore Express® (PES), Durapore® (PVDF), MCE	1 – 100 mL	
Millex® Syringe Filters (33 mm)	0.1 0.22 0.45 0.8	Millipore Express® PLUS (PES), Durapore® (PVDF), MCE	10 – 200 mL	

Large-scale sterile filtration devices

Description	Pore Size (µm)	Membrane	Maximum Process Volume	
Stericap™ PLUS Vacuum-driven Filters	0.22	Millipore Express® PLUS (PES)	2 – 10 L	
Sterivex® Pressure- driven Filters	0.22 0.45	Millipore Express® PLUS (PES), Durapore® (PVDF)	Up to 2 L	
Millex®-GP 50 mm Pressure-driven Filters	0.22	Millipore Express® (PES)	Up to 4 L	
Steripak™ Pressure- driven Filters	0.22	Millipore Express® (PES)	10 L 20 L	

Hydrophobic filters for gas filtration

Description	Pore Size (µm)	Inlet-Outlet Fittings	Membrane	
Millex®-FG 25 mm Syringe Filters	0.22	FLL-MLS, FLL-MLL, FLS-MLS, FLL-Spike	Hydrophobic PTFE, Hydrophobic PVDF	
Millex®-FG 50 mm for gas filtration and protection of vacuum pumps	0.2 0.45 1.0	Stepped Hose Barb with FLS – 1/8 in. NPTM	Hydrophobic PTFE	

FLL = Female Luer-Lok®

FLS = Female Luer slip

MLL = Male Luer-Lok®

MLS = Male Luer slip

Bench-scale Filters

Stericup® & Steritop® Filter Units

Stericup® and Steritop® sterile filtration devices combine superior flow rates and throughput with low non-specific binding and a stable, no-tip design.

Fast flow, low-binding membranes

Membranes with low protein binding ensure that key growth factors and proteins won't be absorbed onto the filter. Millipore Express® PLUS membranes feature low protein binding and faster flow than other membranes. For applications that require ultra-low protein binding, use a device with a Durapore® PVDF membrane.

Stericup® Quick Release Filtration Systems

Work With Ease. Filter With Confidence.

Stericup® Quick Release Filtration Systems streamline your workflow with ergonomic design updates and safeguard your results with the proven performance of Millipore membranes.

- 1 Quarter-Turn Quick Release Funnel Removal
- 2 Frosted Writing Surface
- 3 Lighter Color for Legibility
- 4 Click-Seal Confidence Cap

Additional Features:

- Cap Rests on the Side to Avoid Risk of Contamination
- Stackable Bottles to Save Space

				45	12	SEGPT0045

Stericup® E & Steritop® E Filter Systems

The new 'E' (eco-friendly) additions to the Stericup® family eliminate the plastic filter funnel entirely by threading directly onto the media bottle. Stericup® E and Steritop® E filter devices reduce environmental impact by cutting down on:

- Disposable plastic
- Hazardous waste
- Lab storage space requirements

Usage Guidelines

- Choose a collar thread (38 mm or 45 mm) that is compatible with your glass or plastic media/ buffer bottle.
- The 38 mm thread is recommended for our media bottles and majority of other standard commercial media bottles.
- The 45 mm thread is recommended for wider neck media bottles (such as Gibco®) or 45mm thread glass bottles.
- Use only glass or plastic bottles designed for vacuum applications. For the Steritop® E filter, use a 45 mm threaded glass or plastic receiver bottle no larger than 2 liters.

Your eco-impact, by the numbers:

	Plastics*	Packaging*
Stericup® E Sterile filter Eliminates disposable filler funnel	Up to 26%	Up to 20%
Steritop® E Sterile filter Eliminates disposable filler funnel & receiver bottle	Up to 48%	Up to 69%

Both Stericup® E and Steritop® E sterile filters thread directly onto virtually any commercial media bottle or glass bottle

Stericup® E products use significantly less packaging made from materials that reduce environmental impact

SigmaAldrich.com/green

Stericup® E and Steritop® E Filter Units Sustainability Checklist

Stericup® E and Steritop® E filters thread directly onto any commercial media bottle or glass bottle:

- Reduces plastic and hazardous waste.
- Frees-up storage in smaller tissue culture rooms, where space is at a premium.
- Enhances laboratory compliance with institutional sustainability requirements—or a means for achieving individual environmental responsibility goals.

Stericup® E and Steritop® E filters have the Accountability, Consistency, and Transparency (ACT) Environmental Impact Factor Label, published by My Green Lab®, providing a score based around manufacturing, energy and water use, packaging and end-of-life. The ACT labelled products help labs choose greener life science products. The ACT labels can be viewed on the product pages of each Stericup® E and Steritop® E filter catalogue number; please visit **SigmaAldrich.com**.

Stericup® E and Steritop® E filters are packaged in individual, recyclable pouches for sterility.

Stericup® E and Steritop® E user guides are accessible via **SigmaAldrich.com** or by scanning the QR code on the product label or box, to reduce paper waste.

The Stericup® E and Steritop® E corrugated boxes and dividers have sustainable forestry certification.

Steriflip® Filter Units

For filtering 10 mL to 50 mL volumes without sample transfer steps.

Filter up to 50 mL directly into a centrifuge tube

- Attach the device to a standard 50 mL centrifuge tube containing your sample, flip it over and apply vacuum
- Filtrate collects in the attached 50 mL tube
- Available with optional funnel accessory

Description	Membrane	Pore Size (µm)	Qty/Pk	Cat No.

Sterile Millex® Syringe Filters

Millex® syringe filters provide convenient sterilization of small volumes and are ideal for solutions such as antibiotics and tissue culture additives. Their unsurpassed quality and consistency of results has led to the development of many sample preparation methods that specify Millex® filters.

Manufactured for reliable performance

Manufacturing occurs in a controlled environment using an automated process. Sterile devices are provided with a certificate of quality.

Faster flow rate

33 mm Millex® filters have 20% more filter surface than 25 mm filters for significantly higher flow rate and throughput. The 33 mm Millex has the same hold-up volume as the 25mm Millex.

Higher operating pressure

With a maximum housing pressure of 150 psig (10 bar), solutions can be filtered faster.

Low extractables, low binding

A variety of membranes and housings ensure chemical compatibility with a range of samples and solvents

Research use only Millex® (RUO Millex®) Syringe Filters

RUO Millex® filters are for research use only and are NOT registered medical devices.

These sterile Millex® syringe filters are suitable for use in **laboratory research**.

Typical research laboratory applications include the sterile filtration of:

- Protein solutions
- Tissue culture media
- Additives, buffers, and water

The production of RUO Millex® use the same raw materials and manufacturing process as the medical device. There will be no change to device performance. The only differences are that the RUO Millex® filters are less expensive and are not registered medical devices.

For more information about our Millex® products, visit:
SigmaAldrich.com/Millex

Stericap™ PLUS Filters

Universal bottle-top devices for filtering 2 to 10 L

- Fits on any vacuum-rated bottle, 20 to 67 mm in diameter
- Vented to help prevent filter air lock
- Features fast-flowing, low protein binding Millipore Express® PLUS membrane
- Ideal for fast sterilization of tissue culture media, serum, buffers, or other biological solutions

Related Products: Multiwell Plates

MultiScreen®_{HTS} Filter Plates

Automation-compatible MultiScreen® filter plates that contain a microporous membrane are ideal for clarifying samples or separating suspensions in diverse workflows, including sample clean-up prior to instrument analysis, removal of cellular debris, extraction of natural products and bead washing for immunoassay procedures.

Millicell® Microporous Membrane-Based Cell Culture Plates

Millicell® plates feature membranes that allow easy access to both the apical and basolateral sides of cells. This encourages three-dimensional growth and provides a more accurate *in vitro* model than traditional plastic plates. Both the 24-well and 96-well cell culture plates incorporate patented design features simplifying media exchange for high performance cell-based assays. The plates simplify handling of multiple samples simultaneously, maintain assay integrity, and prevent monolayer disruption during analysis. The assemblies include a choice of a multi-well or single-well feeder tray.
