

Molecular Biology

At Caltag, we provide a wide range of molecular biology reagents and kits. From DNA and RNA to transfection reagents and genetically modified cell lines, in our portfolio you will find everything you need to make your experiment a success. **Talk to us to find out more!**

DNA and RNA

Copy & genomic DNA
DNA/RNA arrays
mRNA, miRNAs, shRNAs

ORF clones, plasmids, vectors

ORF clones
Promoter clones
Lentiviral, AAV, Adenovirus

Great pricing

Quality products

Approachable team

Logistics expertise

Genome Editing Tools

CRISPR stable cell lines
Cas9 nucleases
TALEN & TAL effectors
Safe harbour systems

qPCR and related products

PCR Kits & Oligo Mixes
First strand cDNA synthesis kits
miRNA qRT-PCR kits

Transfection Reagents

For transfection of DNA, siRNA, mRNA, Viral RNA, & more.

Via lipofection and Magnetofection

Stable Cell Lines

Dual-labelled cancer
COVID-19 receptor stable
Cas9 stable
