

# Simplifying lab informatics for the love of science.

Scientific complexity has never been greater, with more complex molecules, operational processes, data sets, and more. Unfortunately, many of today's lab informatics solutions are disconnected from scientific realities, leaving scientists wanting and needing more.

**At Sapio, we know that solving lab informatics starts with making life easier for the scientist. That's why we deliver a science-aware™ platform that is simple to configure, effortless to use, and easy to love. Our solutions remove layers of complexity between scientists and their work, with drag-and-drop workflows, no-code configurability, built-in scientific tools, and the contextual data needed to make a real difference.**

**Realize the benefits rapidly. Because science can't wait.**

**Our clients experience:**

**46%**

rise in System Usability Score (SUS)

**78%**

rise in user adoption

**10x**

improvement in productivity

## Discover what's possible with Sapio.

Here are some of the ways our platform can drive new levels of productivity and insight in your lab.

**Single, no-code platform** to build your workflow, your way.

**Living knowledge graph** that is science-aware™, fully contextualized, and designed for action.

**Pre-built workflows** for NGS, bioanalysis, stability, bioprocessing, in vivo studies, and more to hit the ground running.

**Built-in scientific tools** for CRISPR editing, plasmid design, flow cytometry, 3D plating, and more.

**Collaborative workspace** that enables scientists to work on the same experiment in real-time.

**Seamless connectivity** across your LIMS, electronic lab notebook, and scientific data management solution.

# The Sapio Platform

## The world's first true Lab Triple Play.

Sapio delivers the only science-aware™ platform on the market, built to support your lab workflows from start to finish. With a powerful LIMS, ELN, and data integration solution in one, unified platform, Sapio empowers you to work at the speed of science.

### ELN

An electronic lab notebook that works the way scientists do.

### LIMS

A no-code LIMS for scientists, not software engineers.

### Jarvis

A scalable data solution made for modern science.

## Pharma and biotech leaders who want more from lab informatics choose Sapio.

“The reason we had Sapio as the leader by far was their flexibility. They were able to fit the system to meet site-specific needs, or even implement something across the company that can change on a site-specific basis.”

-Senior Director, CRO

“On the biology side, you have complicated assays, fluorescence markers, etc. That’s why we went with Sapio. The process of getting raw data into the system was much easier than other solutions.”

-Director, Small Biotech

“Sapio did an exceptional job during the implementation process, and communication was really good. We had daily conversations with them and put forth a plan to implement it in 16 weeks.”

-Scientific Leader, Large Pharma

## The clients we are proud to serve
