

Challenges and Opportunities for EU Growth and Convergence: Climate Change, Digitalization, and Knowledge Diffusion

Organizer: Tryfonas Christou (TEDAM team, Joint Research Center (JRC Seville), European Commission). Email: tryfonas.christou@ec.europa.eu

Over the last decades, digital technologies, climate change and energy crisis have placed considerable challenges over the EU perspectives. This session aims to explore the role of those three factors -primarily the development and support from the local governance and the EU of digitalization and AI at the regional level- in shaping the European landscape in terms of growth and convergence.
