Microdata in Regional Science

Organiser: Ana Viñuela, University of Oviedo, Spain (avinuela@uniovi.es)

Abstract

EU Microdata are sets of records containing information on individuals, households or businesses. There are many topics to be addressed from a Regional Science perspective using the EU Microdata, from poverty to employment, consumption, well being, health, housing, migration, etc.

Regardless of the topic analyzed, this Special Session welcomes any research based on EU Microdata (SILC, LFS, AES, SES, CIS, CSIS, EHIS, HBS and TUS) that includes a spatial perspective. It also welcomes research on methodological issues related to EU-Microdata.
