

Oral Presentations Day 1

Wednesday 12th November

10h30 - 12h00

As an oral presenter you will have 8-minutes (maximum) to present your work, with an additional two minutes for questions (maximum), during one of the parallel sessions at the conference.
The oral presentation sessions are allocated dependent on theme. Please see allocated sessions and times below.

10h30 - 12h00 - Education (Durley Suite)			
Paper Number	Title	Presenter	Time
28	Unlocking Potential: Harnessing Virtual Reality as a Teaching Tool for Understanding Autism Spectrum Condition (ASC)	Sasha Bryan	10.30-10.40
43	Reimagining Clinical Education: Building a Multimodal Simulation Program to Advance Clinical Readiness in Undergraduate Nursing	Jamie Riley	10.40-10.50
57	Co-developing a shared decision-making rubric for peer-evaluation in simulation: integrating person-centredness, critical reflection, and collaborative practice	Zainab Zahran	10.50-11.00
69	Real Time, Real Voices: Co-Producing Confidence with Accessible LGBTQIA+ Livestream Simulation for Healthcare Staff	Kirsty Duncan	11.00-11.10
76	Emerging insights into how previous experience and perceived realism influence performance in a multi-patient simulation: A mixed-methods study with senior undergraduate nursing students.	Diana Dupont	11.10-11.20
121	Developing capabilities for the care sector using simulation-based education	Michelle Holmes	11.20-11.30
190	Does learning from SBE last? - IMTSim Impact Survey	Rachel Cichosz	11.30-11.40
202	Radiography student perceptions of a simulated clinical placement to enhance clinical placement capacity: a descriptive qualitative study	Kirstie Brewer	11.40-11.50

Technovation (Westbourne Suite)			
Paper Number	Title	Presenter	Time
390	The Mechanical Performance of ADAMgel: A Comparative Study of Tensile, Compressive, and Durability Properties	Daniella Arboleda Pazos	10.30 - 10.40
211	Immersive room technology in Higher Education, exploring challenges, solutions and future directions.	Giuseppe Leontino	10.40-10.50
300	Enhancing Burns Care for All: The Role of High-Fidelity Moulage Simulation in Advancing Clinical Practice	Gemma Blaza	10.50-11.00
362	Virtual reality simulation for medical students: can we improve engagement and satisfaction?	Lucy Pilcher	11.00-11.10
180	Writing Simulation Scenarios Using Artificial Intelligence (AI)	Damir Rafi	11.10-11.20
388	Using Tabletop Simulation to promote understanding of Total Patient Triage in General Practice, in Surrey.	Nicola Steeds	11.20-11.30
237	Escaping Silos: Using an Interprofessional Escape Room to Enhance Human Factors Awareness and Teamwork in Healthcare	Amna Mahmood	11.30-11.40
176	Cutting Costs, Not Corners: A DIY, Sustainable Solution for Front of Neck Access Training	Egle Mattar	11.40-11.50

Oral Presentations Day 1
Wednesday 12th November
13h00 - 14h30

Education (Durley Suite)			
Paper Number	Title	Presenter	Time
161	Palliative and End of Life Care (PEoLC) Simulation Training in a UK Ambulance Service: Evaluating the effectiveness of experiential learning on prehospital clinician confidence, considering curriculum development and future impact.	Rowena Rickson	13.00 - 13.10
37	Illuminating Learning Disability Experiences: Simulation Collaboration with Northern Stars	Sophie Wilcox	13.10-13.20
51	A Qualitative Exploration of Physiotherapy Students' Opinions of Simulation and the Impact of Acting Students as Standardised Patients.	Philippa Beaumont	13.20-13.30
64	Longitudinal blending of simulation and work based learning to transform future doctors' perceived preparedness to practice.	CP Wilson	13.30-13.40
74	Introduction to Paediatrics: Utilising early simulation to enhance medical students' preparedness for clinical placements	Sophie Jones	13.40-13.50
120	Embedding virtual clinical experience in undergraduate pharmacy education: an observed simulation-based model to enhance primary care exposure	Rosie Byars	13.50-14.00
174	Development and evaluation of a low-cost, high-fidelity ultrasound-guided abdominal paracentesis simulator	Muhammed Shahid	14.00-14.10
184	Improving virtual on-call teaching for medical students and foundation doctors.	Alice Churchill	14.10-14.20

Transformation (Westbourne Suite)			
Paper Number	Title	Presenter	Time
136	Transforming patient safety: Simulating swarm huddles to support a no-blame culture.	Amy Ireson	13.00 - 13.10
98	Creating cultures of trust: Simulation workshops for fostering belonging in diverse NHS teams	Erin Power	13.10-13.20
56	Using a Novel Simulation Approach to Address Incivility and Enhance Patient Safety in the Neonatal Intensive Care Unit	Barah Hassan	13.20-13.30
153	Co-Designing Virtual Reality Simulation Modules with the d/Deaf Community: Collaborative Approach to Inclusive Healthcare Education.	Joanne Davies	13.30-13.40
163	Tackling Deaf Health Inequalities through Simulation	Shannon Kemp	13.40-13.50
225	Cutting Edge: A Gel-Tissue Hybrid Model for Ultrasound Guided Kidney Biopsy.	Ambyr Reid	13.50-14.00
322	Insitu Simulation: Strengthening clinical team performance and improving safety in remote perioperative setting.	Mary Molloy	14.00-14.10
138	Designing out delays to defibrillation.	Radhika Kumar	14.10-14.20

Oral Presentations Day 1
Wednesday 12th November
15h00 - 16h30

Education (Durley Suite)			
Paper Number	Title	Presenter	Time
291	Co-production of simulation teaching with survivors of honour-based abuse	Matthew Bowker	15.00-15.10
305	Uncomfortable Safeguarding Conversations: Strengthening Practice Around Early Childhood Neglect with Multi-agency Simulation Training	Merry Patel	15.10-15.20
324	Empathic care of a person with cerebral palsy: raising awareness through co-produced educational videos and e-simulation informed by real-life experience.	Sue Baron	15.20-15.30
348	Use, Reuse, Resuscitate: Development and Evaluation of an ADAMgel-Based, Reusable Simulation Model for Emergency Paediatric Thoracotomy	Oliver Hart	15.30-15.40
357	Evaluation of a trust-wide ultrasound-guided peripheral venous access training	Alice Epps	15.40-15.50
365	Disaster Preparedness and Management through Interprofessional Education: A Simulation-Based Study among Health Profession Students	Alla El-Awaisi	15.50-16.00
367	Evaluating the Impact of a Regional Novice Anaesthetic Simulation Course on Preparedness and Confidence	Shiv Vohra	16.00-16.10

Education (Westbourne Suite)			
Paper Number	Title	Presenter	Time
318	Impact of Virtual Reality-Based Training on Midwifery Students' Knowledge of Maternal Positioning During Labour: A Pre-Post Study.	Ingrid Bispo	15.00-15.10
344	Paediatric Medical Emergency Simulation Course for Anaesthetic and Intensive Care registrars working on call in a District General Hospital (DGH)	Laura Carter	15.10-15.20
346	Virtual On-Call: A Low-Fidelity Simulation to Enhance the Confidence of Final-Year Medical Students in Managing On-Call Scenarios	Serena Merchant	15.20-15.30
358	Training Resident Paediatric Doctors On How to Deliver In-Situ Simulation	Rebecca Ramsay	15.30-15.40
366	"A transport simulation journey." Embedding in-situ simulation in a joint paediatric and neonatal transport setting: A research project.	Helen Jarvis	15.40-15.50
373	Enhancing Procedural skills Through Affordable Simulation: A Gelatine Based Ultrasound Phantom	Pooja Kamath	15.50-16.00
386	Mastering Medical Emergencies: Embedding a simulation-based educational program to enhance medical students' ability to manage a range of acute medical emergencies	Neil Kinnear	16.00-16.10
