LDDC-FIGON Dutch Medicines Days 7 – 8 October 2026 | Leiden

Innovate. Translate. Cure.

[FIGON Dutch Medicines Days](#) and [Leiden Drug Development Conference \(LDDC\)](#) join forces in 2026! On 7–8 October 2026, these two established platforms in pharmaceutical science and drug development will come together at the CORPUS Congress Centre in Leiden for a single, integrated event, reflecting a shared commitment to advancing science and improving healthcare.

This year's edition, themed "*Innovate. Translate. Cure.*", this event will bring together professionals from academia, industry, and policy to explore the latest developments in drug innovation and healthcare.

The event offers an exciting and diverse program, including:

- Plenary Lectures from leading experts in drug innovation and pharmacology
- Interactive Parallel Sessions exploring cutting-edge research and trends
- Exhibition floor showcasing companies active in the field
- Poster Presentations showcasing innovative work from researchers
- PhD Student Competition showcasing emerging talent from Dutch research institutes
- Networking Opportunities with professionals from across the drug development pipeline

We are pleased to offer organizations the opportunity to participate in the program through an [Industry Innovation Slot](#) and a variety of [exhibition and sponsorship opportunities](#) allow companies to showcase their brand and highlight their contributions to the field.

Are you interested to present your research with an oral or a poster presentation? Submit your abstract and present your work to a diverse audience of professionals. For more info see <https://hyphenprojects.nl/figon-dmd/abstracts>

Attending with a group of Master's students? We offer a 15% discount on registration fees for groups of 5 or more MSc students along with the convenience of a single invoice.
