

Shaping the Future of Healthcare

Innovation for Health

11 March 2027 | Jaarbeurs Utrecht
Transforming Healthcare Together

Transforming Healthcare Together

Powered by **Hyphen Projects**

On 10–11 March 2027 in Utrecht, the Health and Life Sciences ecosystem comes together for two connected events that bring science, investment, and healthcare closer together. The journey begins with **Health Holland Global Investor Forum on 10 March**, where investors and life sciences start-ups meet to explore new ideas and funding opportunities. It continues on **11 March with the 14th edition of Innovation for Health**, focused on how collaboration can help turn scientific advances into better healthcare. Under the theme “**Transforming Healthcare Together**”, the programme explores how ideas move from research into real-world use, and how working across sectors helps make that possible. Join us for two days bringing together innovators, investors, healthcare providers, policymakers, corporates, start-ups, researchers, patient organisations, and technology transfer professionals. Let’s shape the future of health, together.

Calling Early Career Scientists and Innovators: Showcase Your Research at Innovation for Health

Are you a PhD student, postdoc or early-career innovator in Life Sciences & Health? This is your opportunity to present your innovative research at Innovation for Health, taking place on 10–11 March 2027. Why participate?

- **Visibility:** Present your research through a poster to an audience of 800+ professionals from academia, industry, healthcare and investment.
- **Networking:** Connect with key players across the Life Sciences & Health sector and expand your professional network.
- **Recognition:** Get the chance to present your research as part of the **I4H Young Innovator Award**.

The winner receives a €1,000 cash prize sponsored by Genmab, a €1,560 scholarship for the BioBusiness Summer School, and a feature article in BiotechNews.

Eligibility: PhD students, postdocs and early-career innovators working on an innovative Life Sciences & Health project. All research areas within Life Sciences & Health are eligible. **Submit your abstract by 31 January 2027**

For more details, visit www.hyphenprojects.nl/i4h/join-as-a-young-innovator or scan the QR Code.
