

Delivery route for Beatrix Theatre via Mineurslaan

Navigation address: *Mineurslaan, Utrecht (see map on next page)*

Delivery of large amounts of materials

To deliver large items or significant amounts of stand material report to the side entrance at Door 503 on Mineurslaan. This is a side street of Croeselaan to the right of the Beatrix building and you can load and unload here. Please keep the entrance free for security vans, etc.

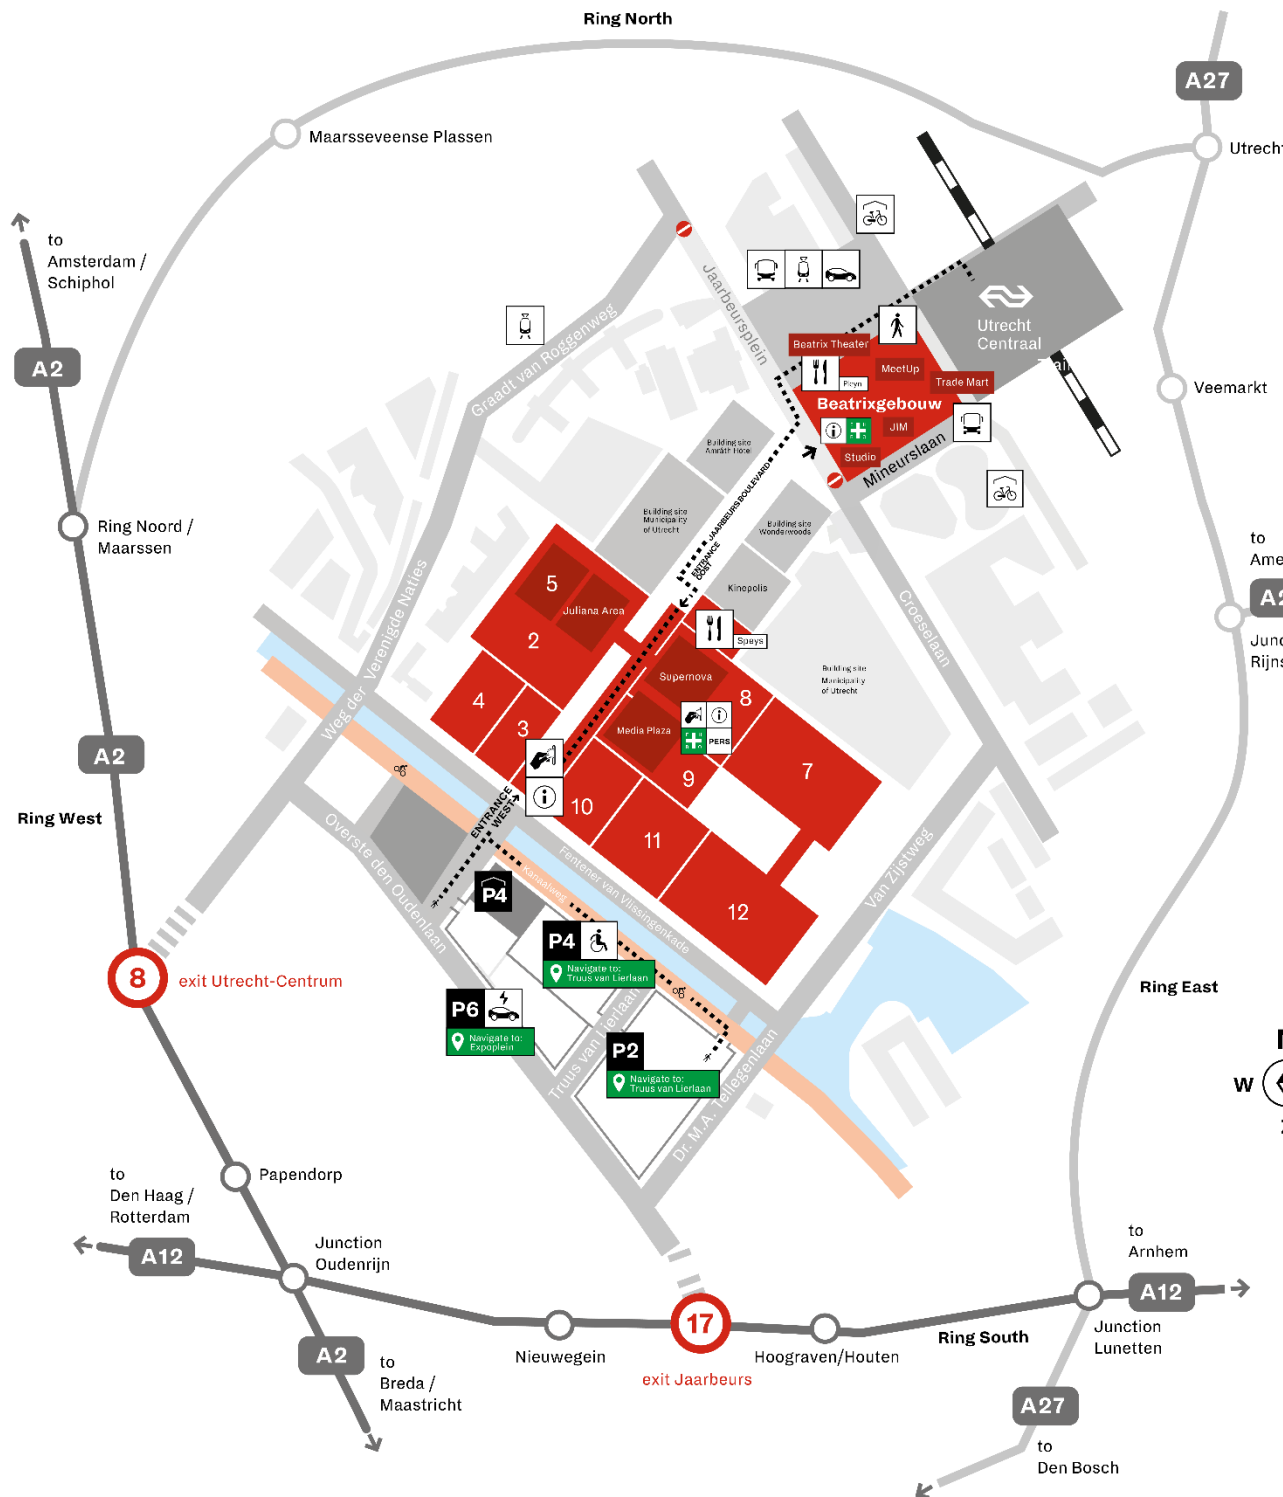

Request a ticket from the porter, which then entitles you to a maximum of 30 minutes for loading/unloading. This will allow other guests the time they also need for this purpose. Once finished you can park your car in the parking areas on the other side of the Beatrix building.

The closest car park within walking distance is P2: walk back to the Beatrix building via Van Zijstweg and Croeselaan. You can also park in P4 or P6 and walk via the Event & Exhibition Centre to the Beatrix building.

Delivery of small items

If you only have small stand items to deliver you can simply park in areas P2, P4 or P6.

JAARBEURS

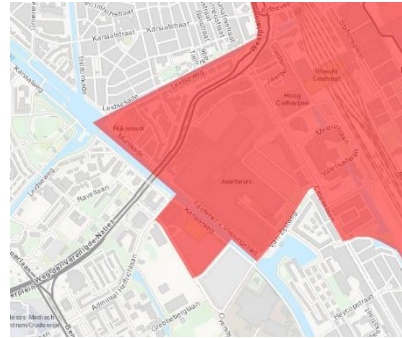

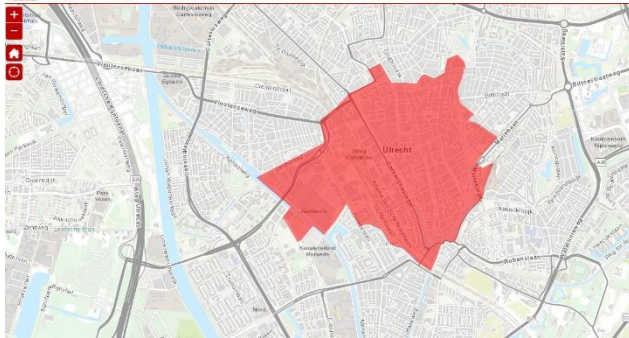

Strict environmental zones for diesel trucks and buses

A strict environmental zone is in place for diesel trucks and buses (public transport and touring). Both types of vehicles require at least emission class 6 to enter the environmental zone. You can be fined 250 euros by the CJIB if you do enter the zone with an emission class 4 or 5 truck or a bus with emission class 5 and below. This requirement applies nationally and to all trucks and buses in environmental zones in the Netherlands.

Environmental zone limits

Royal Jaarbeurs is located inside the environmental zone.

Milieuzone Utrecht

Exceptions for access to the environmental zone

If your vehicle does not meet the access requirements for cars or trucks, you may still be eligible for an exemption to enter the environmental zone. Please see the below website to check which cars and trucks have an exemption. Diesel trucks with emission class 3 or lower are not eligible for exemption. Diesel buses can only request an exemption if they have emission class 4 or 5.

More information about the exemption or exemption requests is available in Dutch via:
<https://www.utrecht.nl/wonen-en-leven/gezonde-leefomgeving/luchtkwaliteit/milieuzone/>
