**What's  
next?**

# Supply chain

- A network between a company and its suppliers to produce and distribute a specific product to the final buyer
- Collaboration between manufacturers, suppliers, distributors, business partners, and consumers from procurement to final delivery

**Johnson & Johnson**

- Renowned annual ranking of the world's superior supply chains

# Johnson & Johnson

Johnson & Johnson  
MedTech

Johnson & Johnson  
Innovative Medicine

Quality Control

- critical to the safety, efficacy, and consistency of pharmaceutical products
- it involves rigorous testing, inspections, and compliance with regulatory standards to detect and prevent deviations

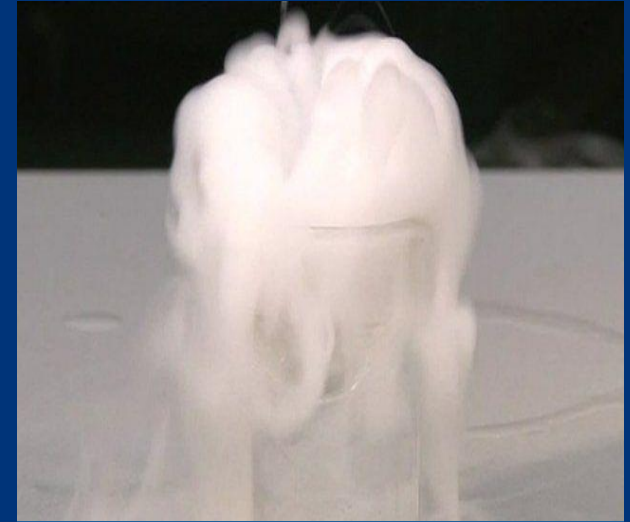

# Raw materials

Powders

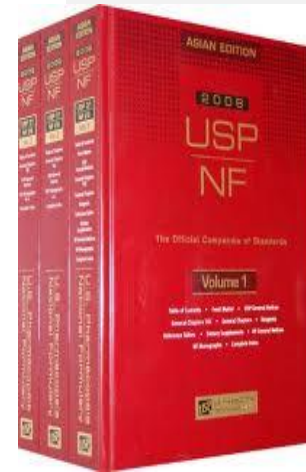

Liquid

Gasses

- Chemicals
- Biologicals
- Media
- Resins

- **Type of test program on MM level**
- **NCL:** non compendia listed / No Monograph exists
- **NCT:** non compendia tested / Monograph exists, but JBV tests according to internal set up test requirements
- **Pharmacopeia:** Pharma grade

- USP
- EP
- JP

QC RM has approximately 300 raw materials on test

Average quantity for testing per material varies from 1 to 400 containers

Min 1

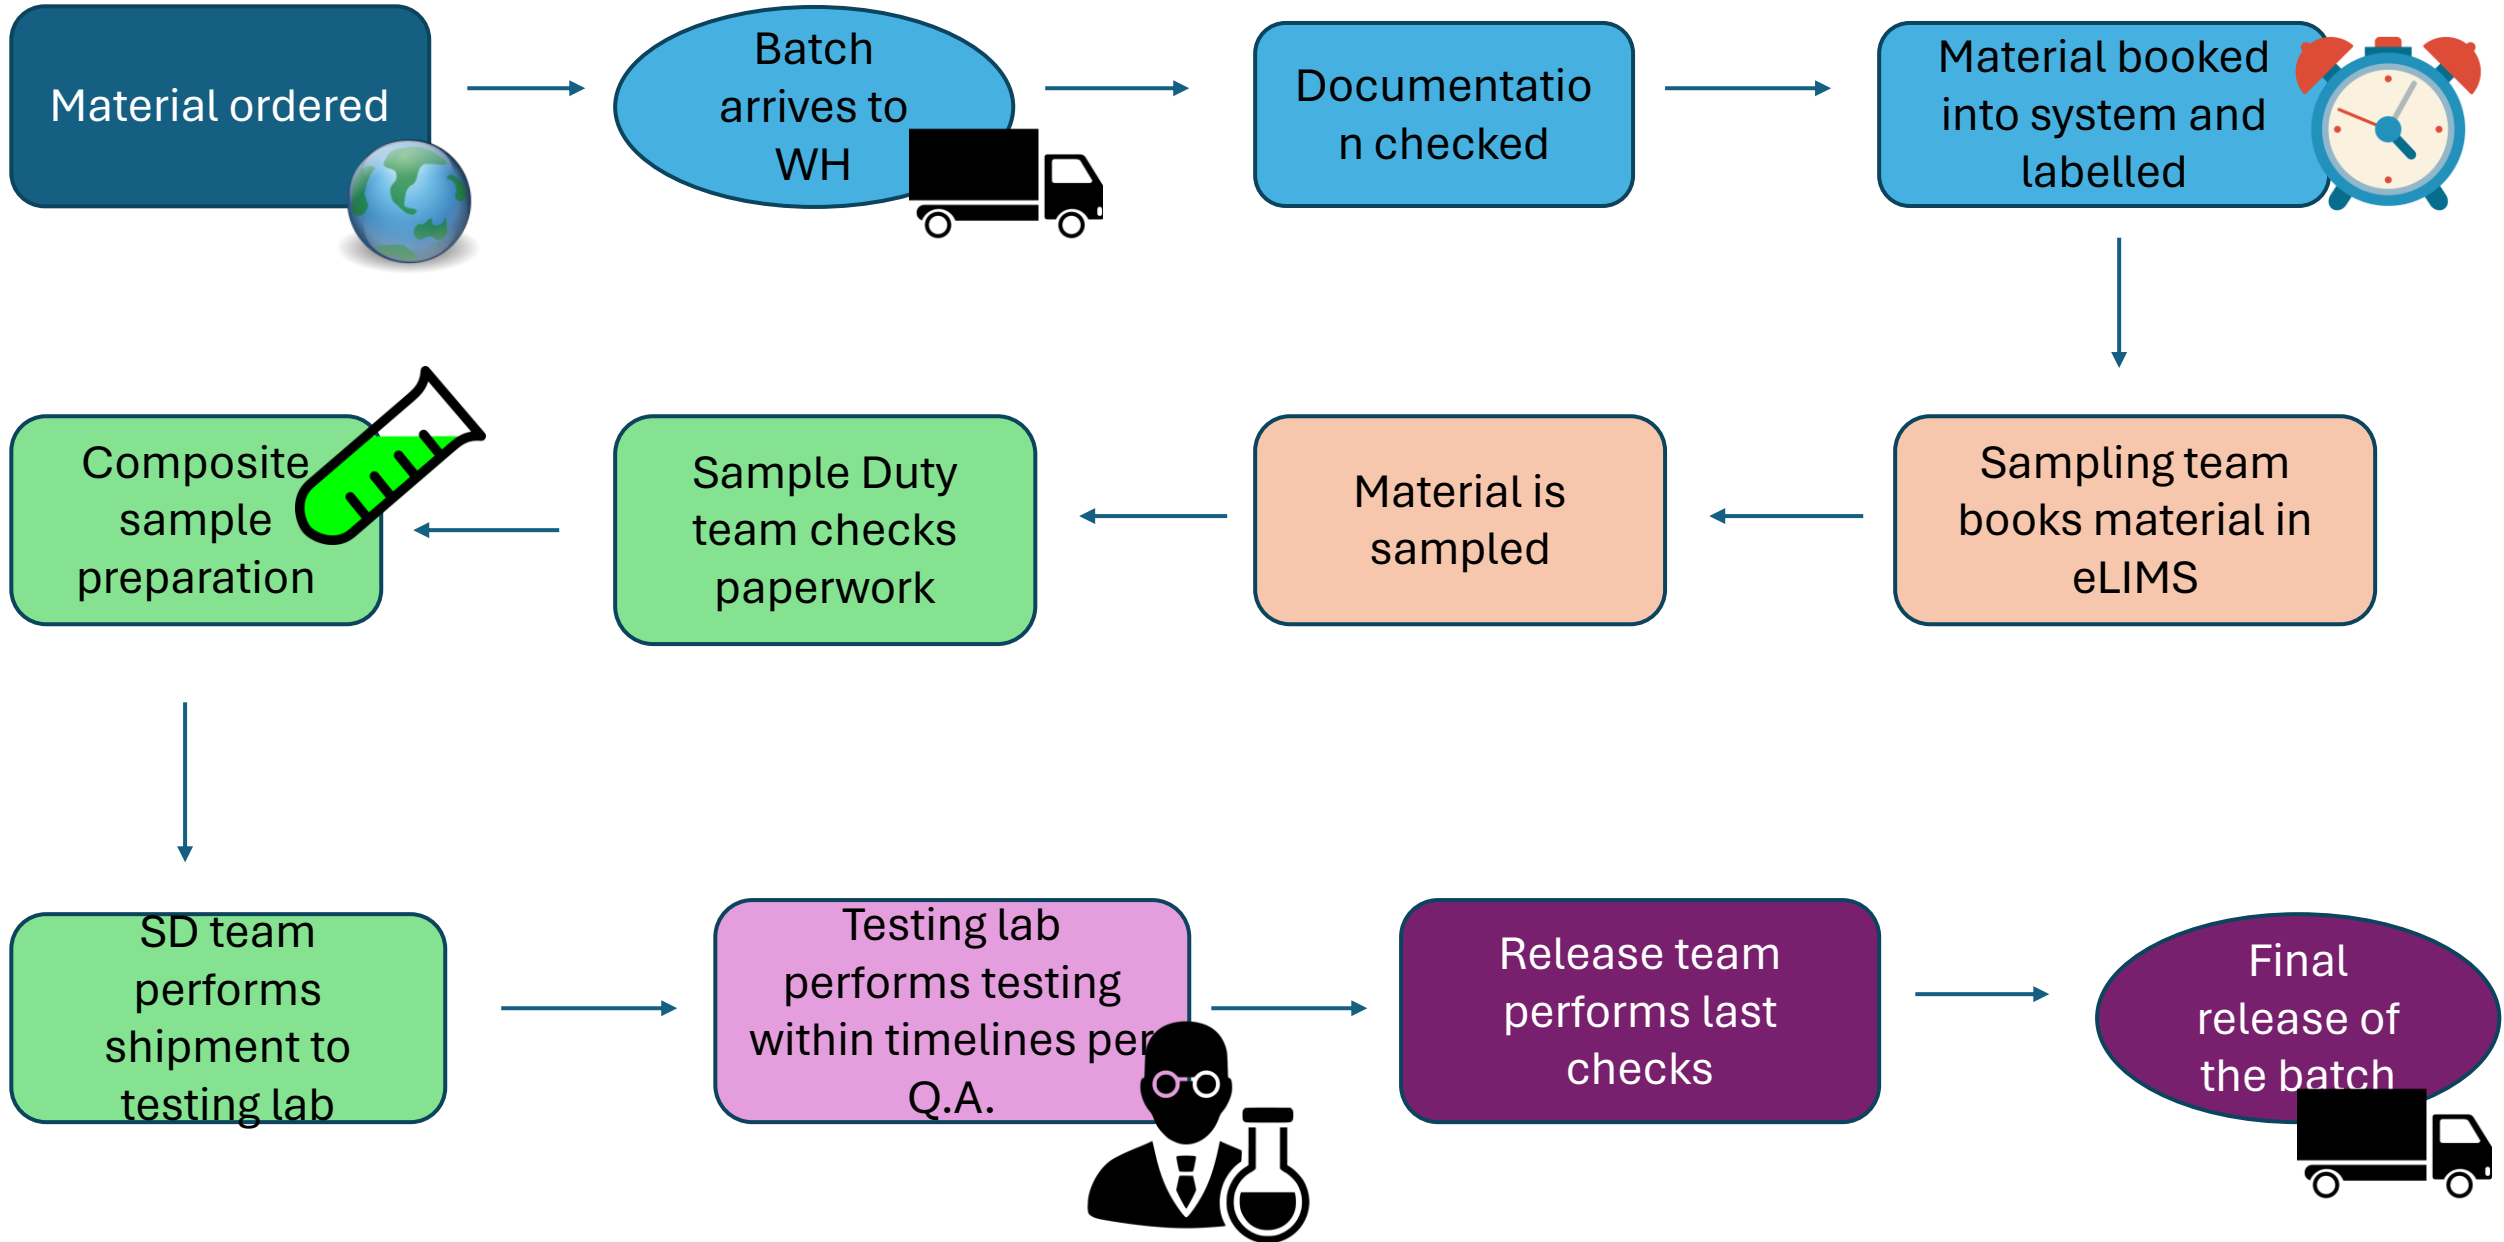

Max 400

Approximately **175**  
**different test**  
**method**  
**preparations**

# Testing coordinator

Lead coordinator for testing of all raw materials, already qualified as well as new materials

Coordination of all testing activities from initial phase until final batch release

Lead investigator for non-conformance (e.g. OOS results)

Conducting investigations, providing impact and risk assessments and defining appropriate CAPA

Daily meetings with internal/external stakeholders (Europe and USA)

To ensure alignment with goals and facilitate the seamless execution of all testing activities

Main goal: provide steady flow of raw materials for production needs

Production of medicine must never be impacted!

# Challenges

GP shift in priority

Ability to adapt, crisis and priority management

Potential crisis for production timelines

Good organizational and problem solving skills

Ensuring alignment between stakeholders

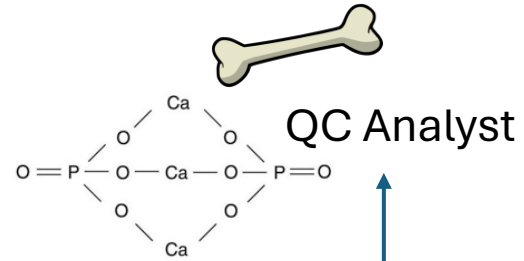

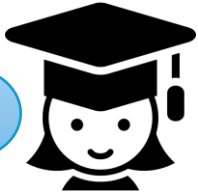

Good communicational and project mapping skills

Critical thinking

Learn to push back and challenge unrealistic timelines

# My career path

July 2019

March 2022

September 2019

Laboratory technician

September 2020

Chemical analyst

November 2022

Associate Scientist  
QC
