

# Physics on Film 2026

18 April 2026, Institute of Physics, London, UK

## The world's only film festival dedicated entirely to physics

Step into a universe where science and cinema collide. From documentaries and sci-fi to physics-inspired art, the festival brings together filmmakers who explore everything from quantum mysteries to cosmic wonders. As Sheldon Cooper puts it, "*physics encompasses the entire universe... from quantum particles to supernovas.*"

## Festival Highlights:

### Morning Session – 10:00–12:30

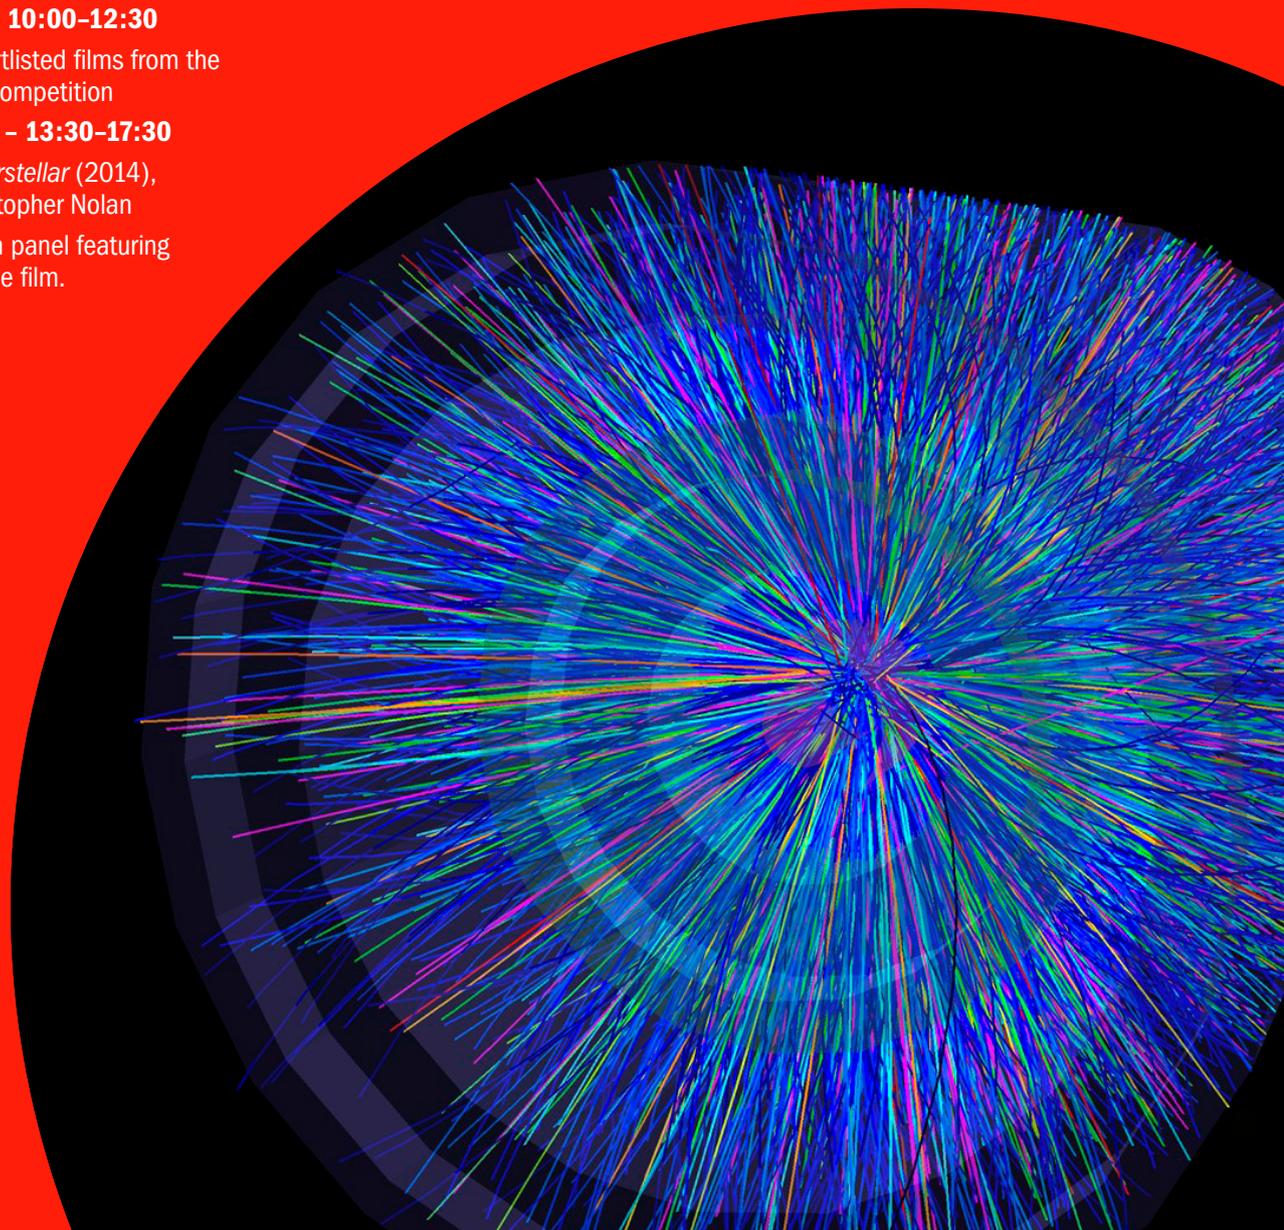

- Winning and shortlisted films from the Physics on Film competition

### Afternoon Session – 13:30–17:30

- Screening of *Interstellar* (2014), directed by Christopher Nolan
- Expert discussion panel featuring contributors to the film.

## Panel:

- Paul Franklin, VFX Supervisor on *Interstellar*
- Glyn Morgan, Head of Collections and Principal Curator at the Science Museum
- Prof Laura Nuttall – UKRI Future Leaders Fellow and Professor in Gravitational Wave Astronomy
- Prof. Olivier Shorttle, Cambridge University
- Eugénie von Tunzelmann, VFX Supervisor/Engineer on *Interstellar*

## Tickets:

**£10 per person – full-day access**

Includes drinks, popcorn, and hot dogs
