

Working Group designation	Lead(s)	Theme of Working Group	Time of Meeting	Location	Open/Working Group members only
Optimal Recall Rate in Breast Cancer Screening	Sisse Njor	The aim is to identify recall rates in organized breast cancer screening programs in various countries and investigate if it is possible to make more firm recommendations about the optimal recall rate, taking into account the different background risks and health care systems.	June 18, 2025 08:15 – 10:00	Comwell Aarhus, Dolce by Wyndham, conference room G	WG members only
Overdiagnosis DCIS	Keris Poelhekken	This WG aims to improve estimates of overdiagnosis of ductal carcinoma in situ (DCIS) in breast cancer screening, explore main contributors and explain factors causing variation in overdiagnosis estimates, coming to a consensus on how to define and evaluate overdiagnosis of DCIS.	June 18, 2025 08:15 – 10:00	Comwell Aarhus, Dolce by Wyndham, conference room K	Open
New Technologies Working Group (NTWG)	Nereo Segnan  Harry De Koning  Francesca Di Stefano	The aim is to assess the evolution of current and future scenarios of cancer screening with respect to the introduction of novel technologies for all preventable/curable cancer sites. It includes looking into the effect of new technologies on metrics, individual cancer risk, and interventions as drivers for updating and changing the approach and methods of screening, including their effects on screening organization, delivery and evaluation.	June 18, 2025 08:15 – 10:00	Comwell Aarhus, Dolce by Wyndham, conference room A	Open
Colorectal Cancer Screening Working Group	Carlo Senore  Iris Vogelaar	Opportunistic and organized screening for colorectal cancer is available in many countries, which provides an opportunity to exchange knowledge to improve its delivery and further reduce morbidity and mortality of this disease worldwide. To address the challenge of reliably comparing the diverse colorectal cancer screening programs while building adequate models that can predict their longterm outcomes, this working group is investigating which methodologies are most appropriate and proposing a consortium that could open new channels for data sharing.	June 18, 2025 08:15 – 10:00	Comwell Aarhus, Dolce by Wyndham, conference room B	Open
			08:15	Welcome and Opening	
			08:15-08:55	Risk-stratification in CRC screening	
			08:15-08:30	Pooled analysis of the impact of f-Hb concentrations on subsequent advanced neoplasia detection – Kevin Selby	
			08:30-08:45	Cost-effectiveness of risk-based screening prior test results – Danica van den Berg	
			08:45-08:55	Discussion of next steps – Carlo Senore / Iris Lansdorp	
			08:55-10:00	International initiatives in CRC screening	
			08:55-09:10	Trends in CRC screening in Europe – Giulia Carbotti	
			09:10-09:20	WEO Screening Implementation Task Force – Carlo Senore	
			09:20-09:35	EOCS4 Cancer – Beatriz Carvalho	
			09:35-09:50	European Council Initiative on Colorectal Cancer – Gian Paolo Morgano	
			09:50-10:00	Discussion – Carlo Senore / Iris Lansdorp-Vogelaar	
		10:00	Closure		
BREAK					

<b>Working Group designation</b>	<b>Lead(s)</b>	<b>Theme of Working Group</b>	<b>Time of Meeting</b>	<b>Location</b>	<b>Open/Working Group members only</b>
General meeting for all Breast Cancer WG's	Antonio Ponti Livia Giordano	Open to all Breast WG leads and members to discuss shared themes and coordination of activities	June 18, 2025 10:15 – 11:00	Comwell Aarhus, Dolce by Wyndham, conference room D	Open
Breast Density and Screening	Livia Giordano	The goal is to update the ICSN 2010 survey by including additional information on the various methods used by different screening programs to record breast density; and, on the policies on disclosing breast density data to women and the communication strategies employed by different programs. The WG will also conduct a retrospective analysis of breast density changes among screened women and their association with breast cancer.	June 18, 2025 11:00 – 11:30	Comwell Aarhus, Dolce by Wyndham, conference room D	Open
HPV-based Screening Implementation in Low- and Middle-income Countries (LMIC)	Muluken Gizaw	The aims of this WG include to assess barriers and facilitators to implementing laboratory quality assurance and screening registries for HPV-based screening in LMICs, and pilot implementation strategies and adaptations in select settings; and, to evaluate pathways of care after primary HPV testing through examining concerns, challenges, and options for triaging HPV-positive women.	June 18, 2025 10:15 – 12:00	Comwell Aarhus, Dolce by Wyndham, conference room K	Open
Lung Cancer Screening	Mike Pignone	This WG aims to understand the current state of lung cancer screening across ICSN member countries through surveys and share best practices for developing and implementing high-quality, equitable programs and track implementation outcomes over time. The goal is to speed the implementation of high-quality programs in countries with the capacity to implement them; and to help develop emerging programs in countries where the infrastructure may not currently support such efforts.	June 18, 2025 10:15 – 12:00	Comwell Aarhus, Dolce by Wyndham, conference room A	Open
Communication Issues in Cancer Screening	Anath Flugelman Andrea Buron Post Cristina Barrufet Gonzalez	This WG aims to enhance, improve and promote evidence-based communication along the cancer screening process, including strategies to enhance informed decision making. It includes several topics relevant to communication, such as improving uptake rates, best practices for informing screening results, addressing language, socioeconomic and cultural barriers, risk communication, and the role of artificial intelligence and other technologies.	June 18, 2025 10:15 – 12:00	Comwell Aarhus, Dolce by Wyndham, conference room B	Open

<b>Working Group designation</b>	<b>Lead(s)</b>	<b>Theme of Working Group</b>	<b>Time of Meeting</b>	<b>Location</b>	<b>Open/Working Group members only</b>
ECR (lunch meeting)	Sophie Mulcahy Symmons Sarina Schwarz Maija Vahteristo	The purpose is to connect and create a supportive network for early-stage researchers working in the field of cancer screening. The group will work to understand and respond to the needs of early-stage researchers, provide networking opportunities, and share experiences on the challenges faced while working in the field and the learnings to take forward. Open to all early-stage researchers including those undertaking a PhD or working for 3-5 years or less post PhD or Masters degree graduation, and striving for equality, diversity and inclusion.	June 19, 2025 12:00 – 13:00	Comwell Aarhus, Dolce by Wyndham, conference room K	Early Career Researchers welcome to attend
