

CV 2024

Bosshardt Dieter, Switzerland

Dieter Bosshardt is Head of the Robert K. Schenk Laboratory of Oral Histology at the School of Dental Medicine, University of Bern. His main scientific interests are in the fields of tooth development, in particular cementogenesis, periodontal tissue regeneration, bone regeneration, and healing/regenerative events associated with dental implants and other biomaterials such as bone substitute materials, barrier membranes, and scaffolds. He is author and coauthor of more than 230 original articles, review articles, case reports, and book chapters. He is a member of the International Team for Implantology (ITI) and the Osteology Research Academy (ORA).
