

CV:

Prof. Dr. Dipl. Ing (FH) Martin Rosentritt is the coordinator and scientific manager of the materials science laboratory at the Department of Prosthetic Dentistry of the UKR University Hospital Regensburg. As an author of more than 250 scientific publications and both co-editor and author of dental textbooks, he is also a nationally and internationally renowned speaker. Martin Rosentritt is a member of various dental associations, serves as peer reviewer and editorial board member for various national and international journals as well as scientific advisor in working groups and societies. His scientific focus is on dental materials and their testing, as well as aspects of the attachment of oral organisms on dental materials and their interactions.
