Thematic Session – 17 May 2023

Practice and Effectiveness of Forest and Grassland Fire Prevention in China

Haizhong Wang

National Forestry and Grassland Administration (NFGA)

People's Republic of China

8TH
INTERNATIONAL
WILDLAND FIRE
CONFERENCE

Mega-forest fires occurred on 6th May, 1987 in Da Xing An Ling (Greater Khingan Mountains), North-eastern China

National Forestry and Grassland Administration (NFGA) and Ministry of Emergency Management (MEM) are responsible jointly for the forest and grassland fire control in China

Guiding Principle: Prevention is the first, elimination must be active, life is paramount, safety must be ensured

The prevention and elimination of forest and grassland fire has been strengthened in integrated, concerted and synchronized manner

Grid Management System for forest and grassland fire control

古韩镇森林防火网格化管理镇级示意图

Constantly strengthening the fire control capacity at grassroots level

Reinforcing the Infrastructure construction for the fire control

A high-level expert group for the fire prevention established by NFGA

Close communication and cooperation for fire control of border areas

Strengthening cooperation to build a beautiful home together

Thank you very much!
