Trubru

Introducing Trubru

- TruBru introduces & operates proven high-capacity 5th generation robotic coffee barista machines to Airports and other selected locations in Western Europe
- We bring 70+ barista quality beverage options to an unmatched productivity footprint of £2000+ / m² per kiosk
- On a verified & sustainable CSR footprint

Trubru value proposition

- Fair Trade & Organically certified beans

- Because being ethical to our employees, partners and suppliers is fundamental to who we are

- Cutting edge fully biodegradable packaging, cups and beverage accessories

- Every cup, straw and lid we serve is sourced and manufactured from Biodegradable and/or compostable materials

- We leverage automation to help move people who work with us up the skills value chain

- We support our staff and partners to develop new skills in the field of commercial robotics & automation

- We offer great value to cost-conscious consumers

- We offer all the complexity of an attended café but with compelling overhead dynamics
- ...and best-in-class concession fees and MAGs.
