Observation or Forecast?

25 km resolution over
the Weddell Sea

Tile F

What is Diffusion?

A generative deep learning technique where we progressively denoise a sample.

Noising/Denoising Process of Forward/Reverse Diffusion

What is Diffusion?

With a trained model,
we get this.

Problem Setup

Autoregressive

10-day rollouts

U-Net backbone

14.2 M parameters

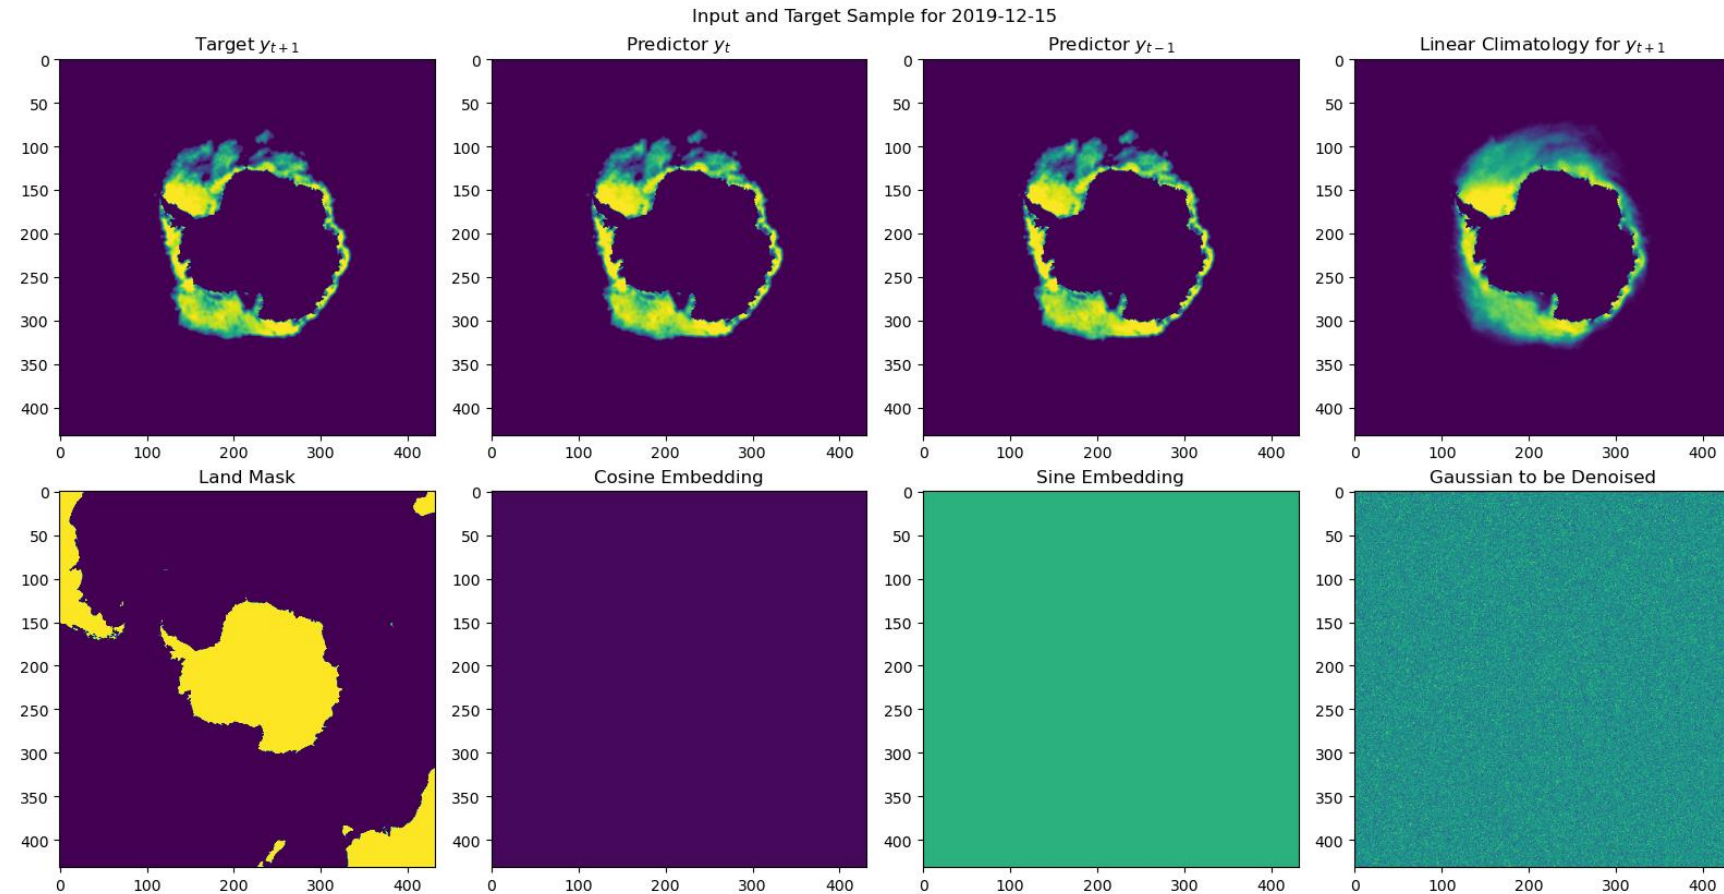

HuggingFace

`diffusers` library

DDIM scheduler with
20 denoising steps

v-prediction

parameterisation

Problem Setup

EUMETSAT OSI SAF
25 km SIC data from
SMMR, SSM/I, SSMIS

1988-2016 training
2017-2018 validation
2019-2020 test

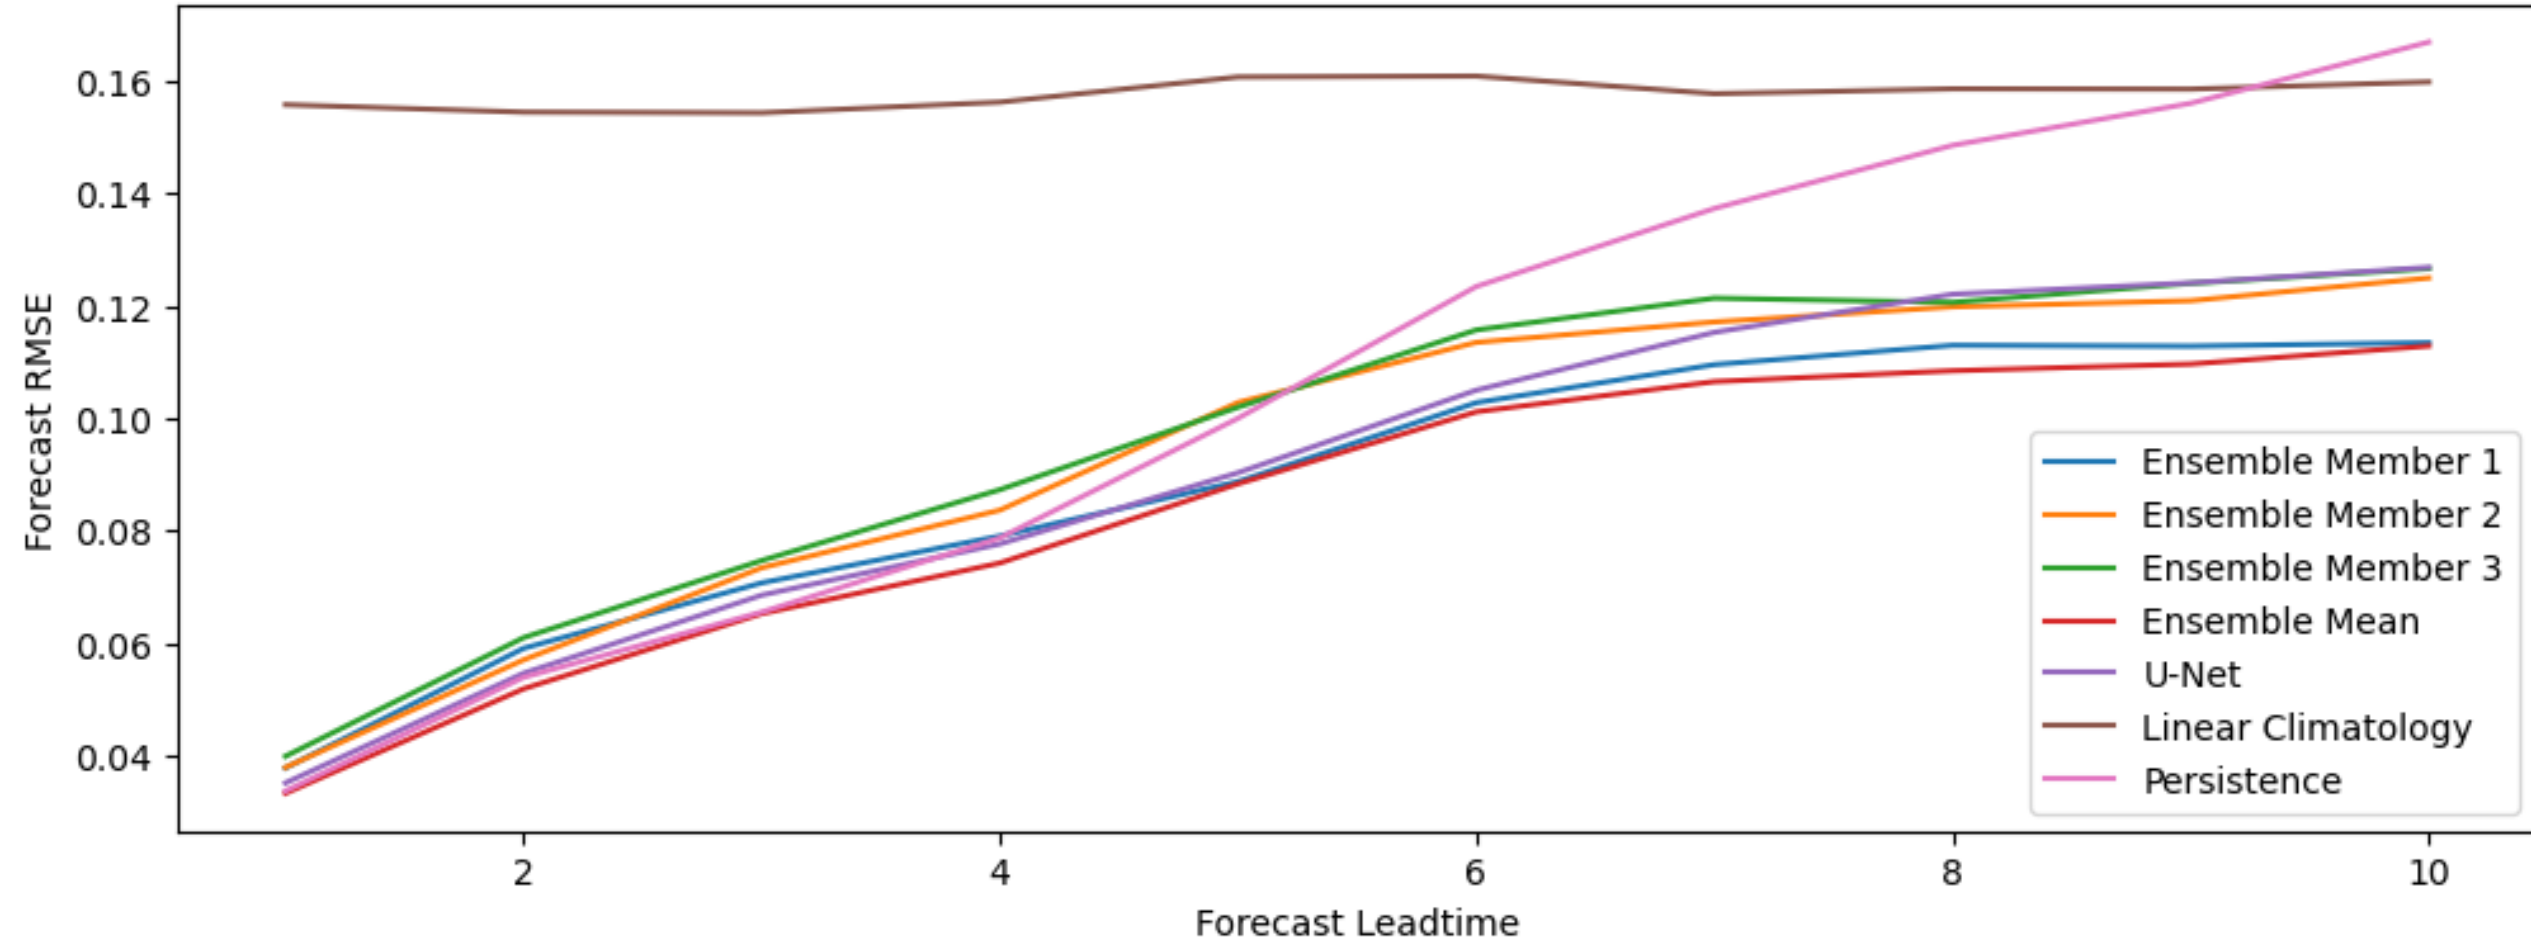

Extensible to other
domains and
variables

Sea Ice Concentration Samples from OSI SAF

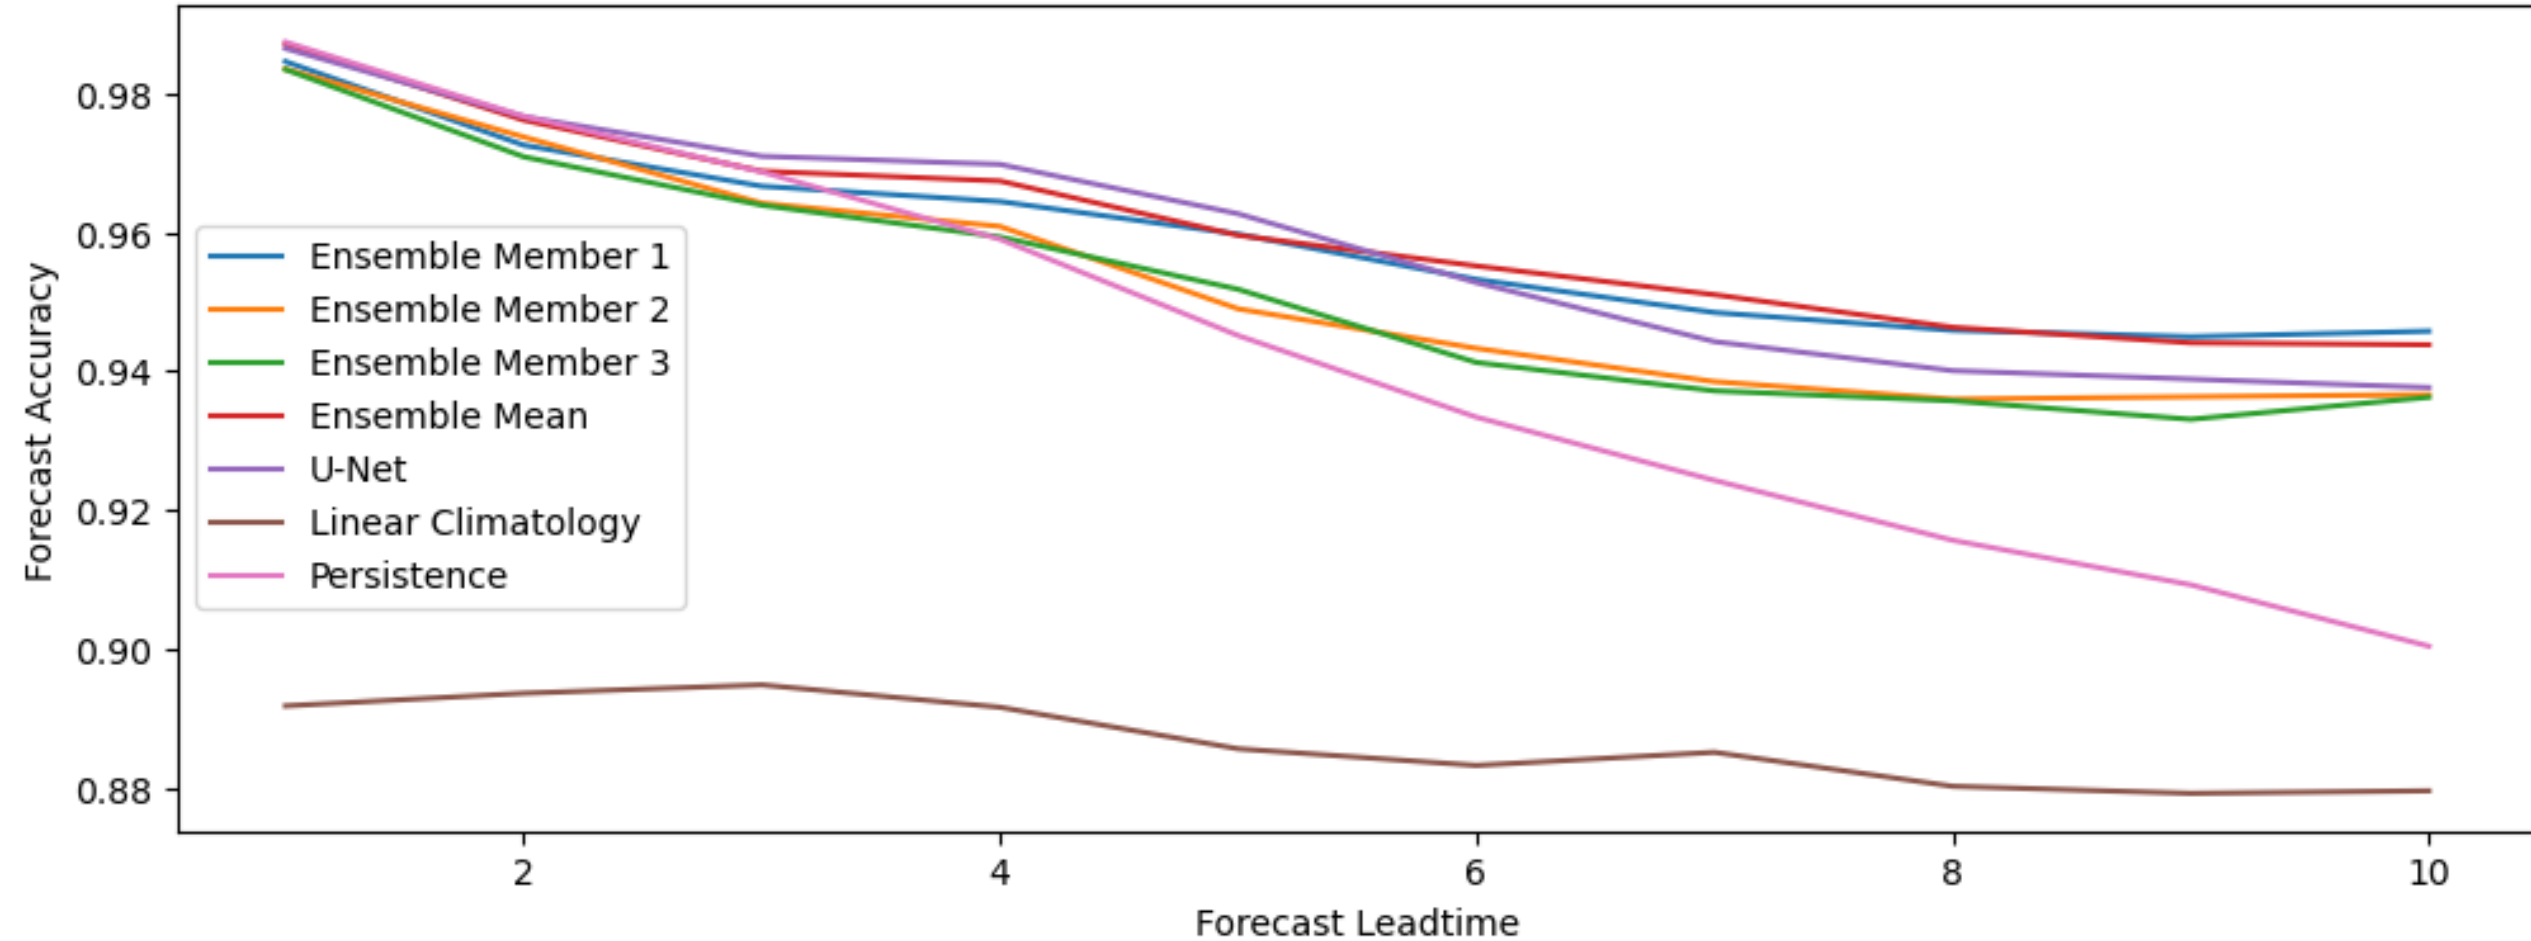

Results

RMSE of 10 Day Rollout for 15-24 December 2019

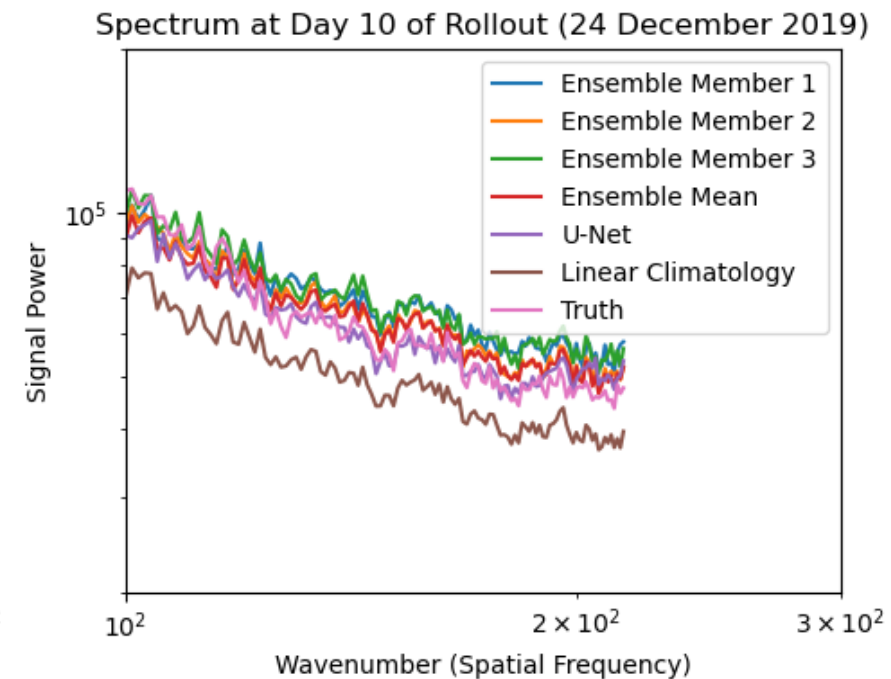

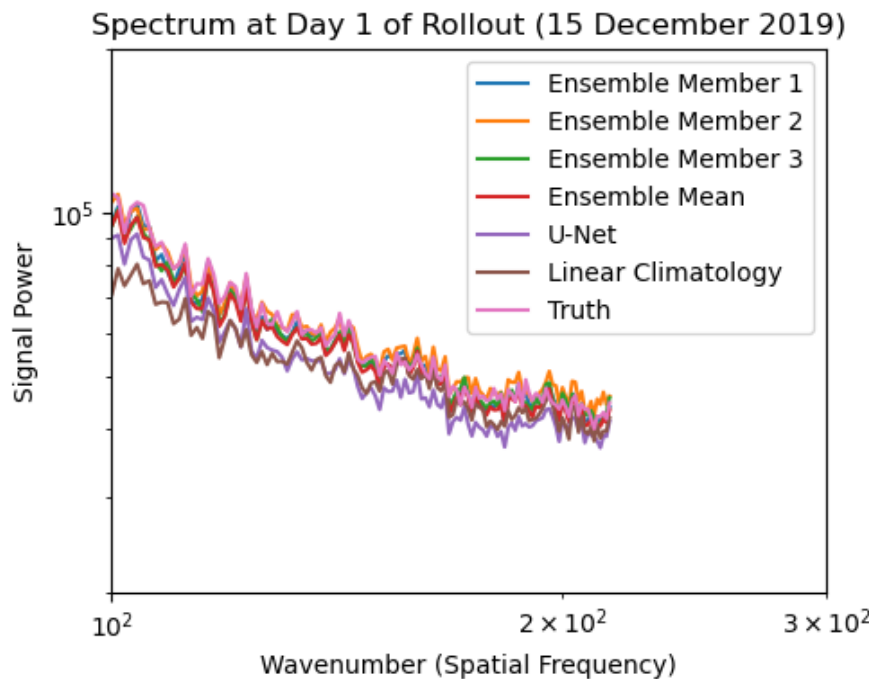

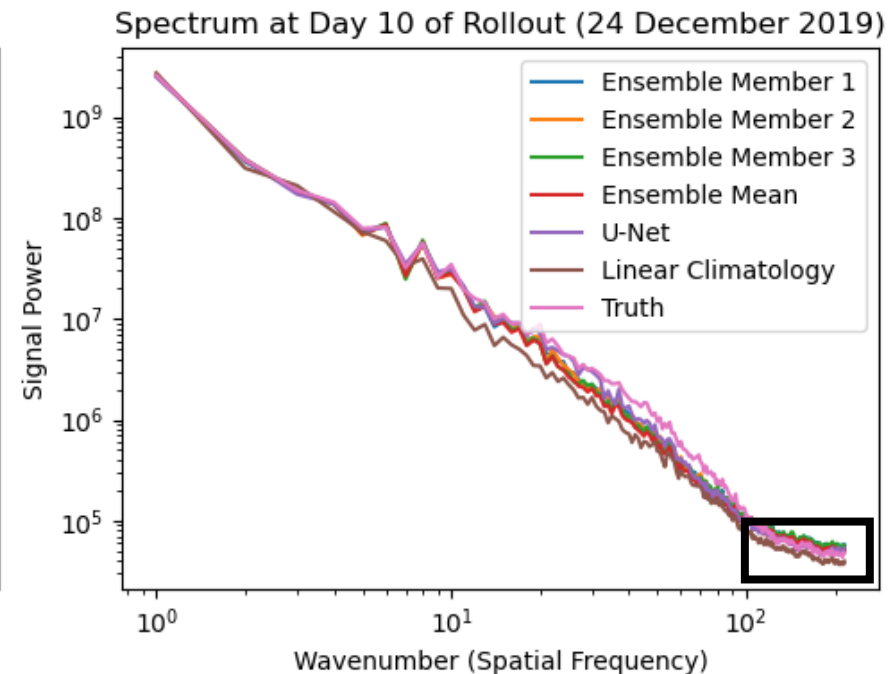

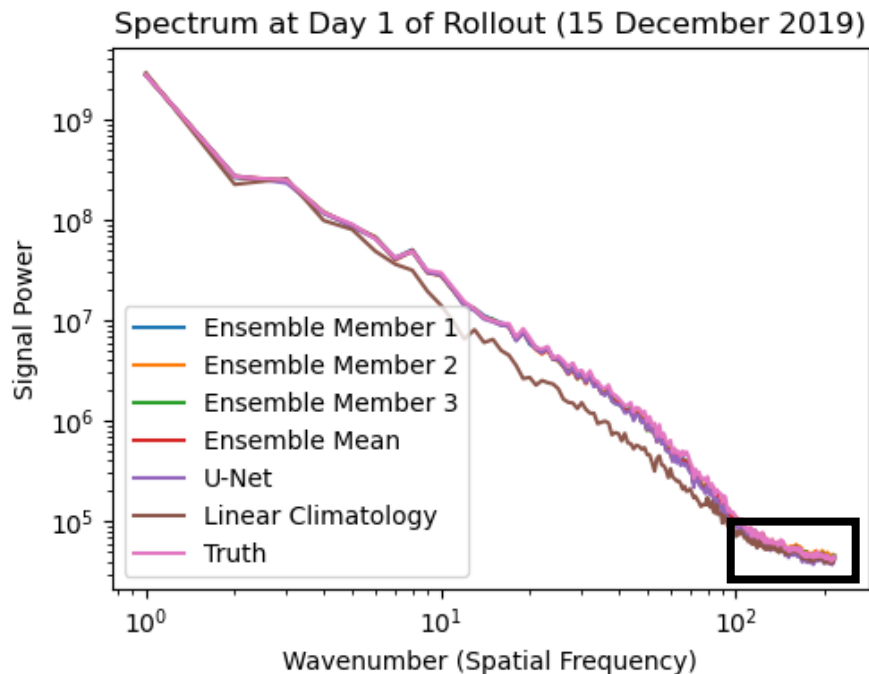

Results

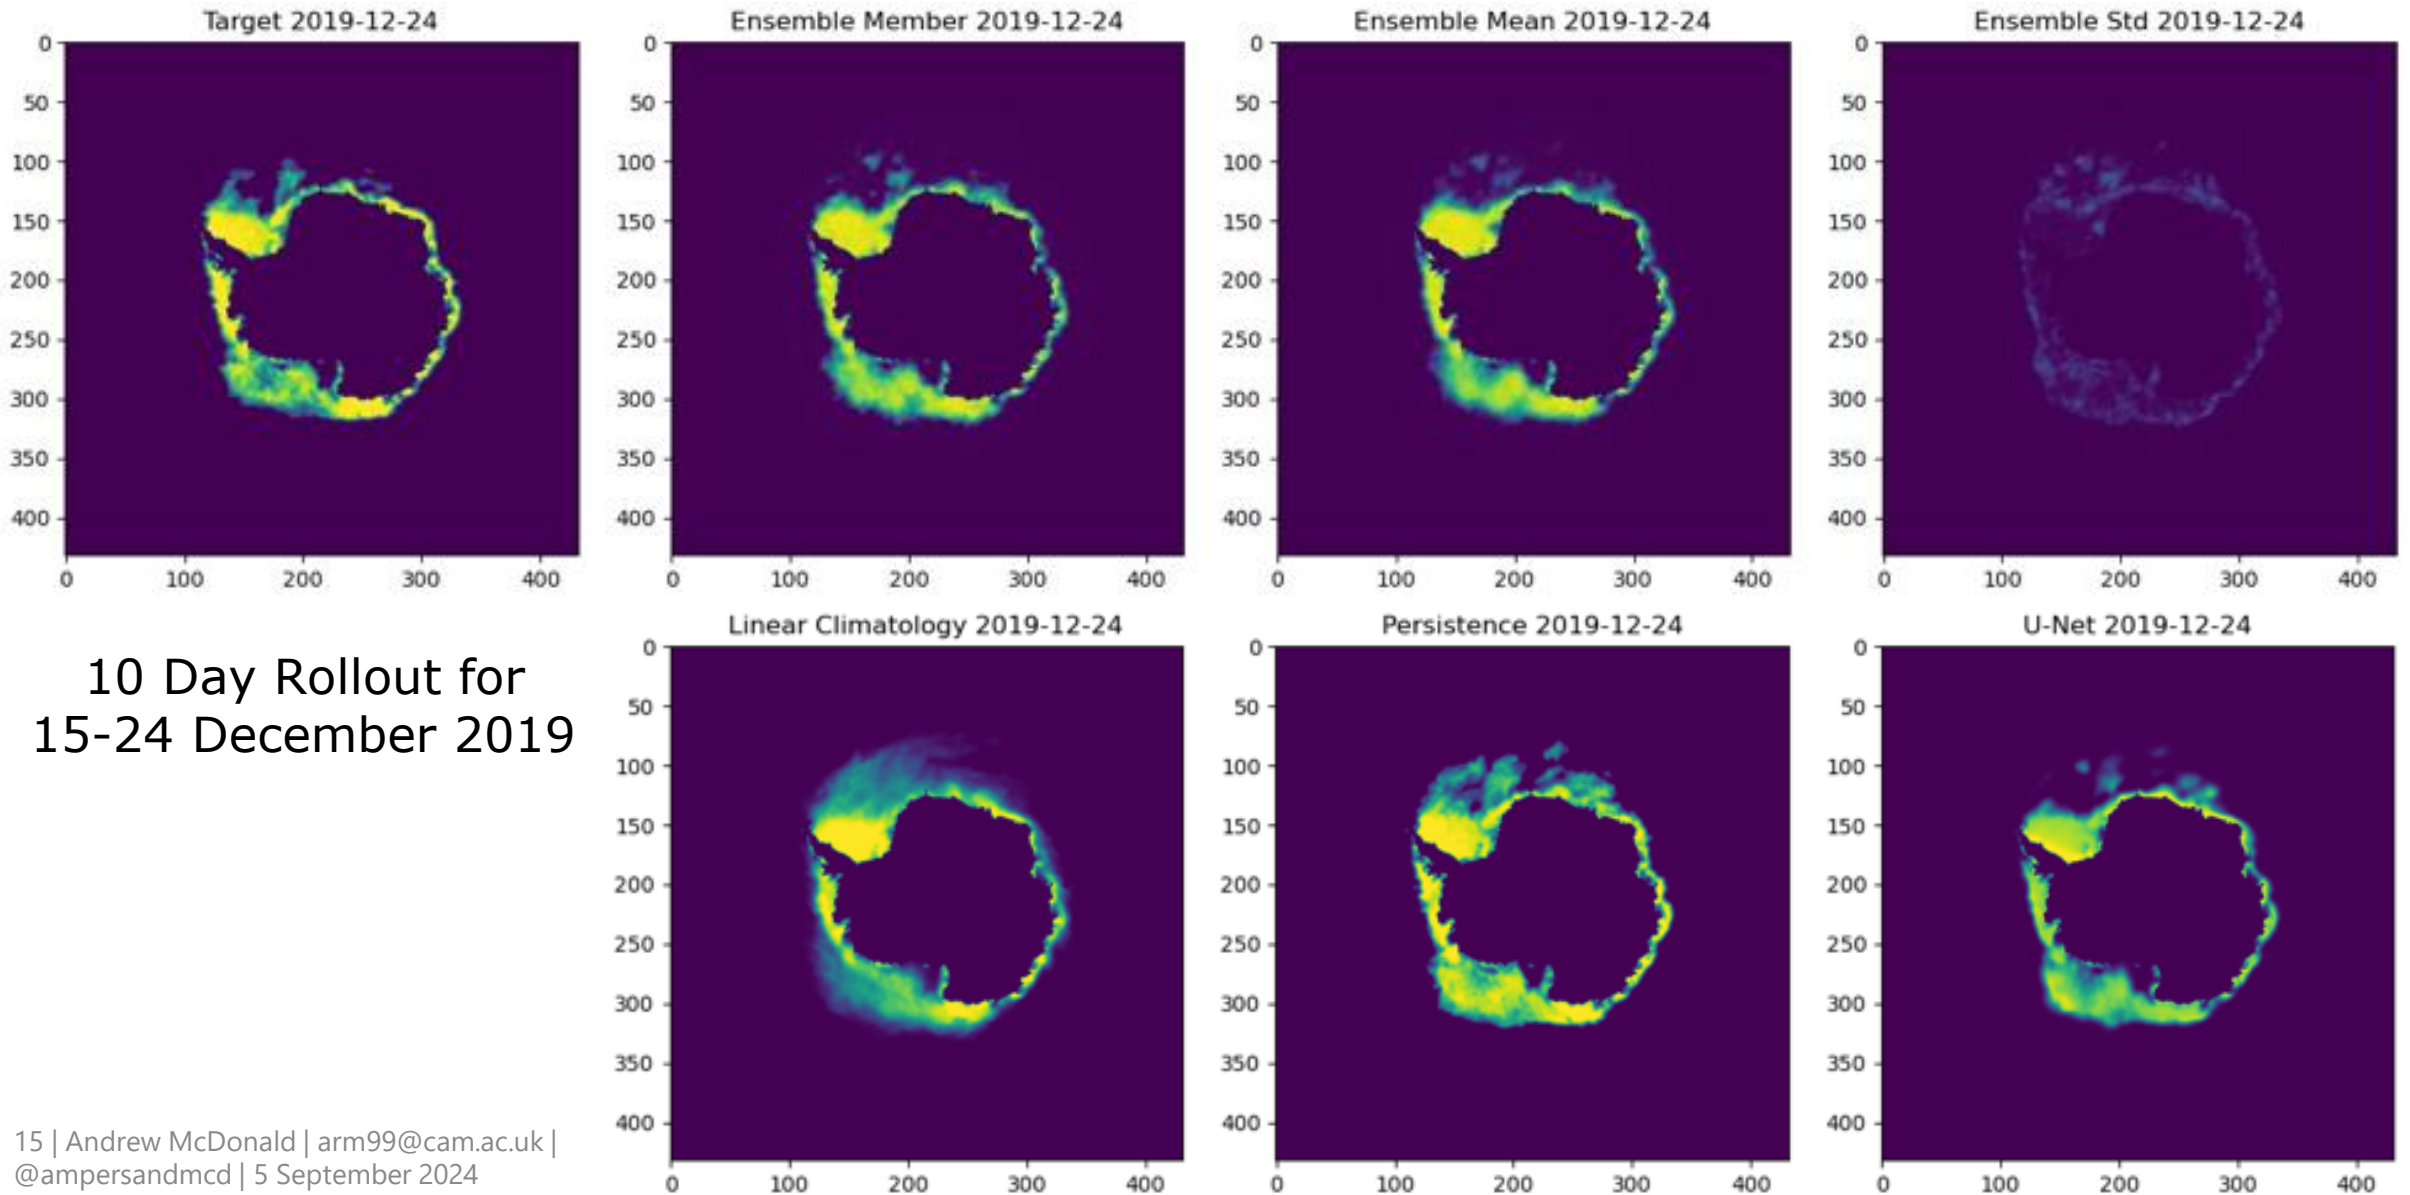

Binary Accuracy of 10 Day Rollout for 15-24 December 2019

Results

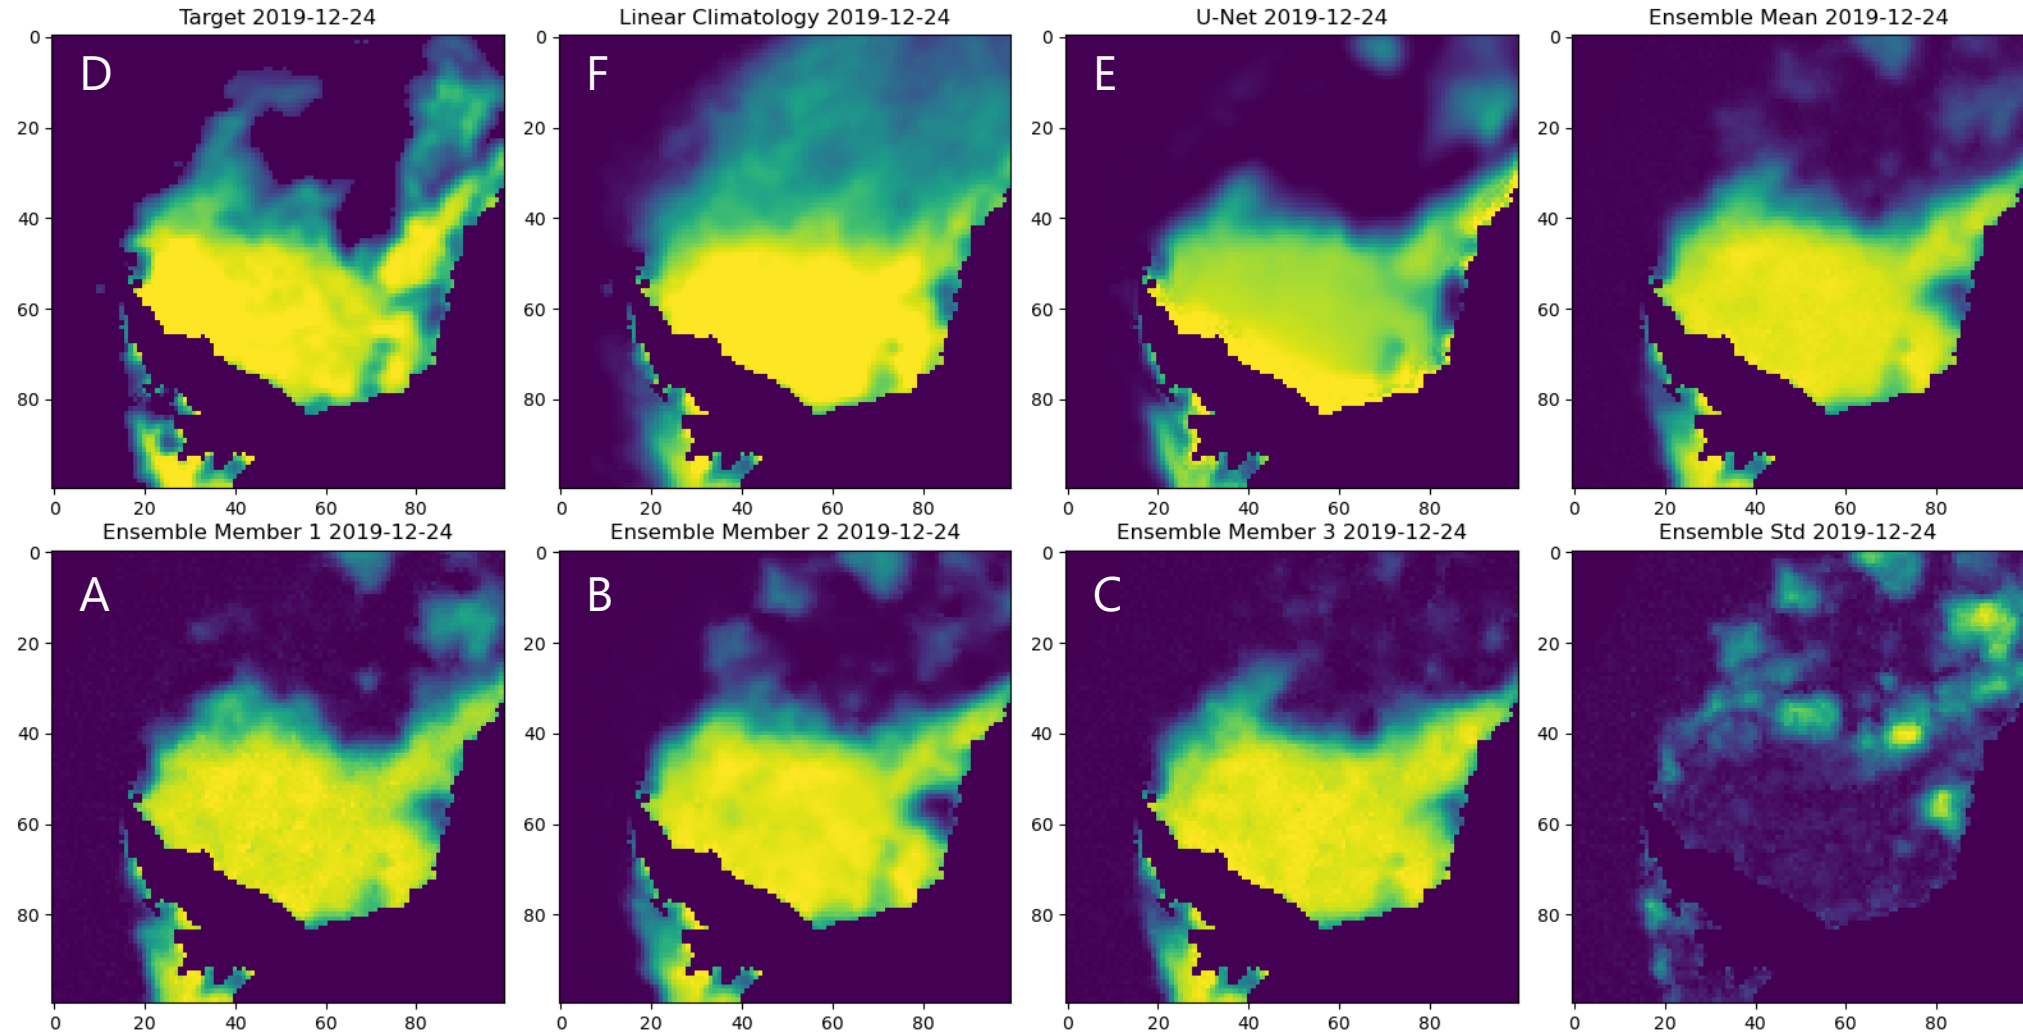

Results

10 Day Rollout for
15-24 December 2019

Results (and answers to Observation or Forecast? quiz)

Weddell Sea at Day 10 of Rollout (24 December 2019)

Future Directions

Better metrics

Longer lead times

AMSR-2 and ice chart data

Latent diffusion

Joint / video diffusion

Vision transformers

Other sea ice variables

Other domains

Downstream integration

POSTER LIST

DAY 3 Thursday | 5 September 2024

	mass change events in Greenland:		
98	Investigation of tidal grounding line migration using SAR line-of-sight offset time series	Sindhu Ramanath Tarekere	German Aerospace Center
99	CryoRad - An innovative radiometric mission for the cryosphere	Marion Leduc-leballeur	Ifac-cnr
100	The Untapped Potential of Using Expedition Ships in the Polar Regions as a Platform for Science & Education	Henry Evans	Hurtigruten Expeditions (HX)
101	Monitoring supraglacial lake dynamics in Antarctica with machine learning	Celia Baumhoer	German Aerospace Center (DLR)
102	SnowDrone - Measuring snow depth on sea ice using a drone-based snow radar	Robert Ricker	NORCE Norwegian Research Centre
103	Iron availability dynamics in Antarctic coastal lakes: insights into yeasts tolerance to Fe by studying RNA adaptation response	Maria Papale	ISP-CNR
104	Deep Sea Learning: Detection of Southern Ocean Taxa Using Computer Vision	Cameron Trotter	British Antarctic Survey
105	DiffIceNet: Forecasting sea ice with conditional latent diffusion	Andrew McDonald	University of Cambridge
106	Arctic ASAP – an uncrewed airship for polar science	Skipper Darlington	Arcticasap.org

— Polar observations, models and data

— The current state and forthcoming changes in the polar regions

2024 European Polar Science Week

THE REAL-WORLD IMPACT OF AI IN THE POLAR REGIONS

European Polar Science Week

11:00 - 12:30, Friday 6th September 2024

The Queen's Hall, The Black Diamond, Copenhagen

Session organised by
