

Faxitron® Core Specimen Radiography System

Immediate Core Sample Verifications.

Introducing the Faxitron® Core Specimen Radiography System from Hologic.

Eliminate delays for core sample verifications with the Faxitron® Core system, which is designed to provide high-resolution imaging within seconds.

Faxitron® Core System Features:

Innovative CMOS Technology

The proprietary detector in the Faxitron® Core system can facilitate up to 14 lp/mm resolution and achieves one of the highest image qualities in the industry.

Automated, Accurate Image Measurements

Automatic Exposure Control (AEC) and auto-calibration optimises images at the touch of a single button. Images can then be sent to PACS for shared review and archiving.

Customized X-Ray Tube

The Tungsten target in the Faxitron® Core system has been optimised for core specimen imaging.

Fully Self-Contained

The Faxitron® Core system is a self-contained unit requiring no additional x-ray shielding.

Versatile Specimen Drawer

A built-in drawer designed to be used with our easy to use consumable tray that allows for the transportation of the biopsy to pathology.

Easy to Use

No additional training or specialised x-ray requirements are needed to operate the Faxitron® Core system.

Ergonomic Design

The minimal footprint and elegant form of the Faxitron® Core system allows for optimal placement at the point-of-care.

A Comprehensive Family of Solutions

The Faxitron® Core system fits right into Hologic's full range of specimen radiography solutions. Hologic has a complete set of specimen imaging products for Radiology, Surgery and Pathology to help you improve efficiency, optimize the patient experience and deliver the best outcomes possible. Talk to your representative about the solutions that can best suit your needs, ensuring your patients have the best possible care when they need it most.
