
DHC Group - Cardiac solutions

DHC GROUP

DHC Group is the umbrella company for a range of diverse UK Healthcare brands, which are all connected by a common purpose – to supply specialist outpatient pathways and diagnostic imaging services.

With over 20 years of experience and a national footprint, DHC Group delivers market-leading services tailored to clients' needs across the public and private healthcare sectors.

Our areas of expertise include radiology (mobile / relocatable, CDCs and static sites), cardiology and dental imaging.

Our vision

To deliver outstanding healthcare services as a technology focused leading provider.

Our mission

To provide first class patient care on every occasion with a world class workforce.

Our values

Respect, Care, Professional,
Safe, Excellence.

Venturi Cardiology

One stop shop cardiology clinics

Venturi Cardiology provides independent cardiology clinics, offering rapid access to clinical consultations and advanced diagnostic investigations. Using the latest technology, we provide patients with easy access to the very best cardiovascular care.

Working with the NHS

We are passionate about providing a cardiology service that combines clinical excellence with innovative and accessible patient pathways. We are keen to build relationships and explore the ways in which we can support the NHS with reducing waiting lists, increasing local capacity, or working together to develop new pilots and pathways.

Our service provision can deliver significantly reduced waiting list times in comparison to some current NHS cardiology outpatient wait times. Our consultants have worked with and for the NHS for many years so understand the pressures and demands.

Offerings

Clinical and Virtual consultations

Tests:

- Chest Topogram
- CT Calcium Score
- CT Coronary Angiogram

Diagnostic Healthcare

Mobile cardiac solutions

At Diagnostic Healthcare we work with the Diagnostic Imaging sectors leading manufacturers to provide the latest in Cardiac MRI and Cardiac CT technology.

With over 20 years experience of partnering with customers across the UK healthcare sector, our flexible services are able to meet the individual needs of your organisation.

From short term equipment deployment on or offsite to support your inhouse replacements and upgrades, or provision of additional capacity on a short or long term basis - we have everything you need.

Our expert Cardiac teams led by our in house team of Consultant Cardiologists, can tailor delivery to your exact requirements and compliment your existing services seamlessly.

We can offer:

- ✓ **Unit Rental -**
mobile and relocatable solutions
- ✓ **Managed service -**
fully staffed service, with highly experienced, directly employed Radiographers
- ✓ **End to end service -**
including patient administration and reporting

ECG On-Demand

ECG On-Demand

Part of **DHC** GROUP

12-lead ECG Interpretation and Holter monitoring

ECG On-Demand® are a 12-lead ECG Interpretation and Holter monitoring service. We are one of the largest, most sophisticated specialist suppliers of ECG analysis services in the UK.

We are the first NHS Digital assured HSCN connected service that allows a customer the option to analyse their own ECG data using a machine learning platform to strict NHS information governance standards.

Why choose us?

We are one of the few digital cardiology diagnostics providers that have been inspected by the Care Quality Commission (CQC). CQC inspection provides our customers with the assurance of quality, safe cardiac care.

As part of our patient-first care philosophy, our services deliver the highest levels of efficiency and accuracy, with all reporting undertaken by UK-trained cardiac physiologists under the governance of UK consultant cardiologists.

Age is no barrier, we have a specialised paediatric team, overseen by our consultant paediatric cardiologist, who can handle both 12-lead ECG and Holter monitor reporting from neonates upwards.

The technical infrastructure of ECG On-Demand is highly available and secure by design, with all of our services hosted within ISO 27001 datacentres in the UK.

NHS customers enjoy peace of mind knowing we hold Cyber Essentials Plus certification. We meet all NHSx/NHS Digital requirements, providing services via the HSCN/N3 network.
