

DMC Radiology Reporting is uniquely placed to provide bespoke Targeted Lung Health Check (TLHC) services

Administration

Our parent company, DMC Healthcare, has **partnered with the NHS since 1967**, and has a track record of excellence in initial lung health checks and ongoing patient management

Scanning

We **collaborate closely** and foster **excellent relationships** with prominent scanning companies

Reporting

Expertly led by a team of specialist Chest Radiologists, our clinical reporting team excels in interpreting LDCT results, supported by cutting-edge AI for precise detection of lung nodules

Our IT architecture is built on leading Lung Nodule AI-CAD software working in concert with our clinical database platform

DMC Radiology Reporting's **consultant-led** team stands as a trusted partner for both the NHS and independent providers, showcasing a track record of unwavering reliability.

Strong team of dedicated PERFECTS-accredited, experienced TLHC screen-reporting UK thoracic radiologists.

Inspected and rated

Good

Our co-founders - **Professor Simon Padley** and **Professor Sujal Desai** - are **renowned consultant cardiothoracic radiologists** based at the **Royal Brompton Hospital** (London). Each possesses over 30 years of radiological expertise, guiding a team of exceptionally skilled TLHC reporters.
