info@vertexih.co.uk

Vertex Physician Portal (VPaP), was designed to give physicians and patients secure and simple access to manage their radiology data

Accessible from any device, allowing radiology departments to scale down on administrative tasks, removing paper from the workflow, as well as film & CD's. Thee Portal has real time view & update of patients status in the workflow from the requested booking through to the finalised report, allowing consultation planning to be more efficient

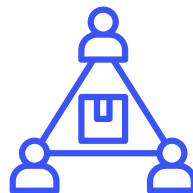

Empowering Physicians with Secure and Seamless Data Access

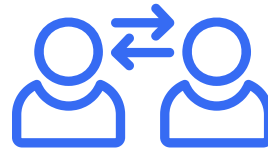

Access Health Information

Better Health Outcomes

Increased Care Co-ordination & Engagement

Better Two Way Communication

2 Factor Authentication System

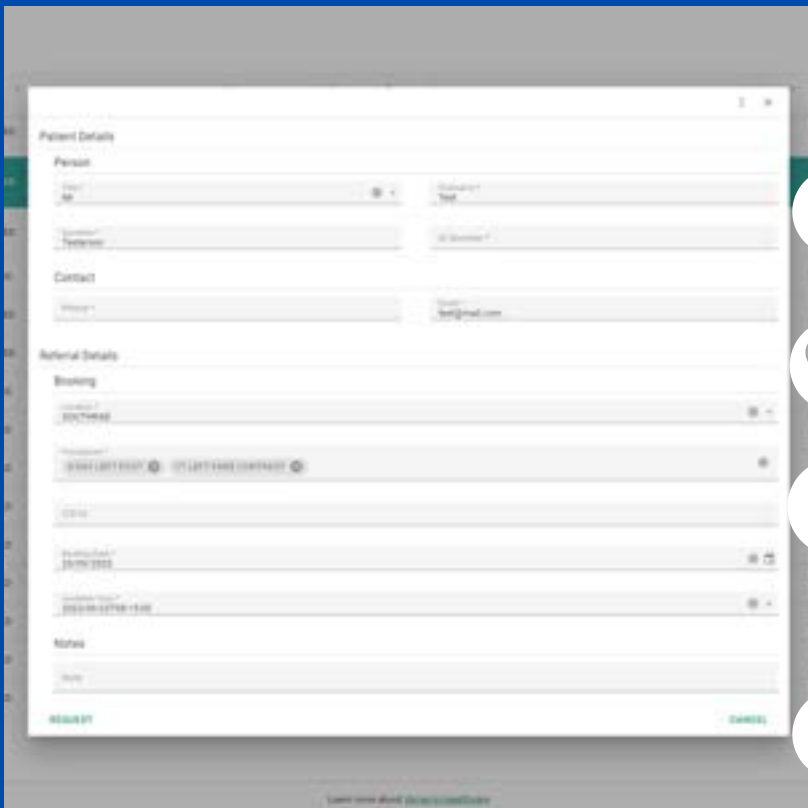

A rich selection of image manipulation tools is available for specialist applications, as well as the ability to share images & reports within a limited time period for security

VPHP KEY FUNCTIONALITY

-  Request Bookings
