## Calmed CT1800 - Automated Insufflation System

---

With increasing demand for CT colonography in both screening and diagnostic applications - a high quality, automated system that provides maximum patient comfort and consistent insufflation throughout the examination.

Fully automated - automatic control of gas pressure and gas flow during the examination process.

Optical and acoustic alarm at deviations from normal operation standards.

Easy to operate - a minimal setup of user friendly, button aided controls.

Calmed's universal tube set ensures optimal patient comfort and incorporates a micron filter to eliminate cross contamination.
