

insightsoftware Solutions

Tax and Transfer Pricing

Automate tax data collection and processing, freeing up time for critical analysis.

Close & Consolidation

Connect data from all key finance processes for a faster, smoother close.

Financial Reporting

Drill into the details of your live ERP data directly in Excel.

Operational Reporting

Accelerate the distribution of actionable, operational reports and analytics with intuitive software including pre-built content to immediately address your most pressing operational questions.

Budgeting and Planning

Shrink budget and planning cycles while improving accuracy.

Disclosure Management

Accurately refresh lengthy stakeholder documents in a single click with data direct from your ERP.

Equity Management

Manage, administer, account for, and report on equity compensation plans.

Streamline Your SAP Reporting and Data Management

Although every ERP comes with native reporting tools, they can prove inflexible when it comes to creating custom and ad hoc reports. SAP ERPs enable you to capture vast amounts of detail, but with a steep learning curve. Wands, Angles, Process Runner and Process Runner GLSU create a free flowing, two-way data highway, allowing you to report, upload, download, and validate data in your SAP system.

"Wands allows us to operate as we need, rather than being forced to fit into a specific reporting structure."

— Stewart Starr,
Management Accounts
Assistant at British Library

Wands is a Microsoft Excel add-in that is certified for integration with SAP and tailor-made for ECC and S/4HANA. Take control of your financial reporting with:

- > **A direct connection** to your SAP ECC or S/4HANA ERP data
- > **Drill down** into detail for analysis
- > **Automated** distribution of reports

Angles makes insights easily accessible and consumable for business users. With Angles, you can:

- > **Enable automatic extraction** of data from production SAP ECC or S/4HANA instances
- > **Free IT resources** from custom report development
- > **Access interactive dashboards** with rich visualizations

“[Angles for SAP] empowers our operating companies with self-service BI and shows them where they can save a lot of money.”

- Leonard Stein, Technology Specialist, Heineken

Process Runner empowers users to easily create, extract, update, and manage SAP data straight from Excel without relying on IT. Process Runner GLSU, designed for finance professionals, accelerates routine processes like month-end close. With Process Runner products:

- > **Automate** transactions for any SAP module
- > **Validate** data before uploading to SAP
- > **Improve** cross-org collaboration with pre-built templates and file sharing

“Process Runner GLSU is so easy to use.”

- Tom McGrath,
Accounting
Supervisor-
Record to Report,
Commercial Metals

SAP Solution Extensions

Our SAP Solution Extensions enable faster, better, and more cost-effective SAP Central Finance implementations by enabling and streamlining third-party data integration.

- > **Aggregate** all financial transactions into a powerful central system
- > **Drill down** to view original financial and operational transaction details
- > **Separate** the Central Finance project from a data governance project

“SAP Central Finance Transaction Replication connects all our finance systems to provide a real-time view of actuals and enable consistent performance tracking and global reporting within SAP S/4HANA.”

- Craig Jessep, Head of Reporting Systems,
Fonterra Co-operative Group Limited
