NexGen ERP with S/4HANA is the future of Evonik's business processes

Motivation

1. Enables digitalization and opens up future opportunities
2. Opportunity to focus on process standardization and harmonization to increase efficiency
3. Future-oriented technology as embedded analytics, Fiori apps and artificial intelligence

How are we going to do it?

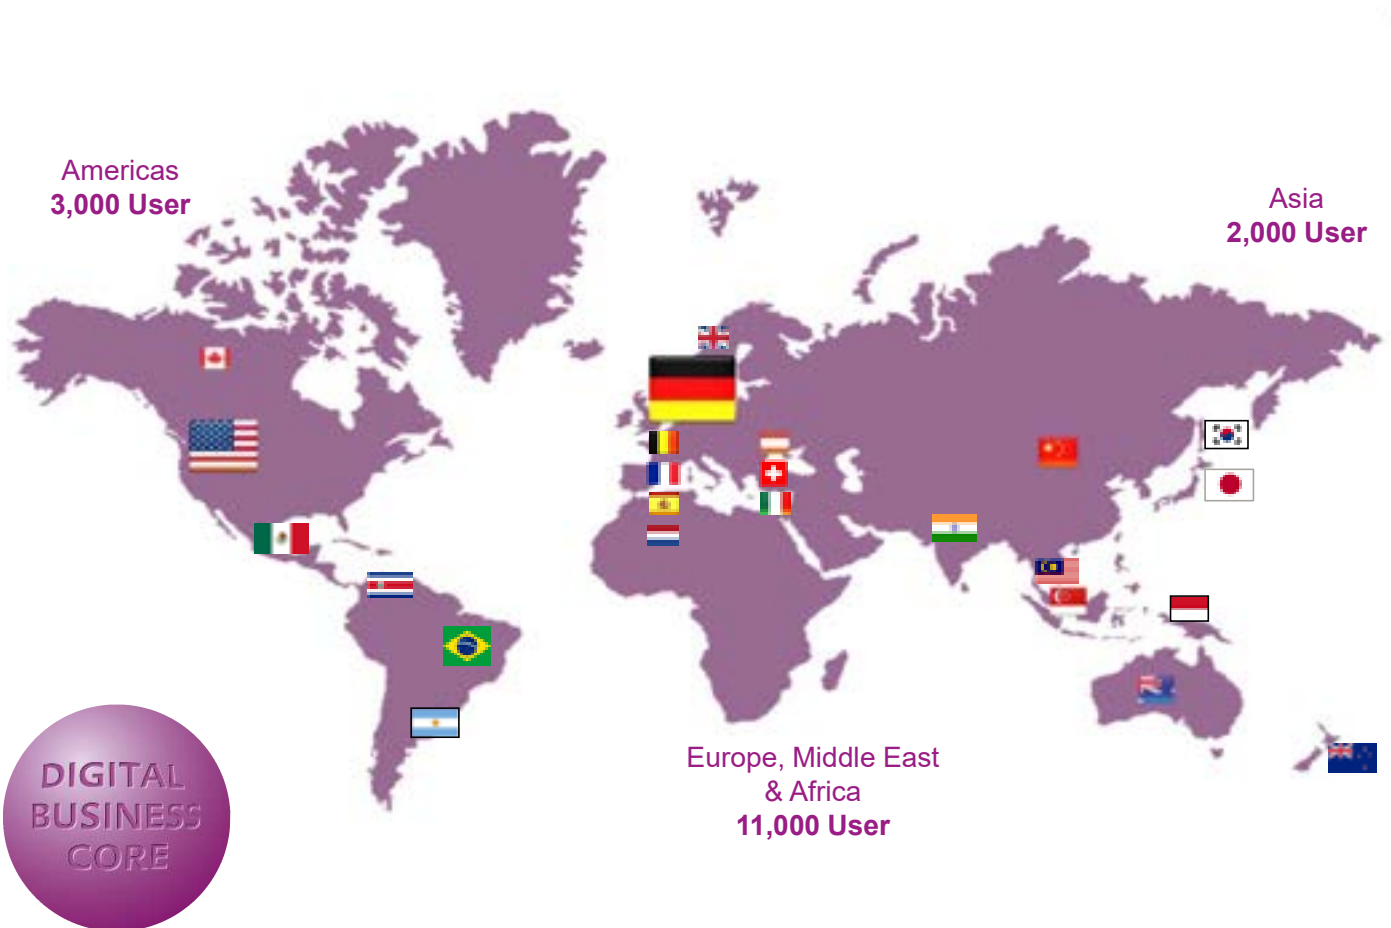

Opportunities

Best in class business processes with the Digital Business Core

- Best in class processes
- Harmonized master data
- One source of truth

Paradigm Shifts

The interaction between trading partners will change along the entire process

What?

- New entirely digital products
- Data-enriched products

With whom?

- New scouting possibilities for discovery
- More data enables better decisions

DIGITAL
BUSINESS
CORE

In which way?

- New business models
- Make-or-buy

How?

- Automation of entire processes
- From just “procure” and “sell”, the entire “experience” will be managed
