

International Conference on Cyber Security & Data Protection, presented by SAP and TAC Events

Bridging the Visibility Gap

23 – 24 May 2023, Amsterdam, The Netherlands

In collaboration with

JOIN US

After the success of last year's event, we are delighted to be returning in person for the 2023 edition of our International Conference on Cyber Security & Data Protection, taking place on 23 – 24 May 2023 in Amsterdam.

Protecting your business' virtual footprint is more important than ever, with new cyber attacks being reported in the news almost every day. Business leaders are putting a greater focus on cyber risk management, making this a key part of their financial and operational plans.

Over two days attendees will have the opportunity to hear from numerous global SAP customers, partners and the SAP experts themselves. We will be coming together to learn how our speakers are using SAP solutions to build robust security measures to identify, analyze, and neutralize cyberattacks in their applications as they happen and before serious damage occurs.

New for 2023, this year's conference will be co-located with the International SAP Conference on Internal Controls, Compliance & Risk Management. The two events will be exploring industry synergies with shared keynotes and a combined exhibition allowing extended networking for our attendees and more. As part of your ticket, you will have the opportunity to move freely between both agendas.

Best regards,

Vincent Doux

Senior Director,
Center of Excellence for GRC
SAP EMEA North

Michael Heckner

WORKSHOPS

TUESDAY 23 MAY

During the pre-conference workshops you will have an opportunity to review functionalities, dive deeper into topics, get practical examples, take part in discussions, go through online demonstrations, and determine the business benefits available from SAP. Each workshop provides you with a unique opportunity to address challenges, discuss them with your peers, and gain valuable guidance from some of the most knowledgeable SAP cyber security, access governance and data protection experts

The workshop activities take place on the morning of Tuesday 23 May. You can find out more information on workshop fees under [Tickets & Offers](#) on the event website.

Pre-Conference Workshop (09:00 – 12:30)

Discover What's New in SAP Cyber Security and Data Protection

REGISTRANTS NEED TO BRING THEIR LAPTOP TO PARTICIPATE IN THIS WORKSHOP

A “Cyber” focused Workshop in three parts:

1. Authentication and Single Sign-On (SSO) in Hybrid Landscapes

Secure access to SAP business applications combined with ease-of-use for the end-user is a key requirement for identity access management in hybrid landscapes. In this session an overview about the capabilities of the SAP Cloud Identity Services will be provided; from basic authentication, X.509, biometric authentication/FIDO to various options for multi-factor authentication. We'll investigate the SSO protocols SAML and OpenID Connect and their suitability for Principal Propagation. Finally we will have a look at SAP's plans for a Secure Login Server in the Cloud. This planned new service aims to offer additional options for authentication to business systems accessed with SAP GUI.

Led by: Marko Sommer, SAP

2. Get Hands On with ETD – Quick Training on Enterprise Threat Detection 1/2

The first half of this training session will cover:

- SAP ETD solution overview
- Access to SAP ETD training system
- Working with the Forensic Lab

Led by: Michael Schmitt, SAP | Arndt Lingscheid, SAP

3. Get Hands On with ETD – Quick Training on Enterprise Threat Detection 2/2

The second half of this training session will cover:

- Processing alerts and investigations
- Pseudonymization of user data
- Monitoring Dashboards
- Log Learning – How to learn a new Log Source

Led by: Michael Schmitt, SAP | Arndt Lingscheid, SAP

AGENDA

TUESDAY, 23 MAY 2023

08:00 **Workshop Registration and Morning Refreshments**

09:00 – 12:30 **Optional Pre-Conference Workshop**

12:30 **Conference Registration and Lunch**

13:30 **Opening Remarks from TAC Insights and Chairperson**

Zoe Mainwaring, TAC Insights | Anna Otto, SAP | Vincent Doux, SAP

13:40 **Stay Focused in Turbulent Times: What Risks to Look Out for in 2024 and Beyond?**

When adverse events hit the market, companies need to react rapidly and adapt to a new normal. A phrase (and a phase) that we all learned during the 2020 pandemic which showed the necessity of being ready. The only way to be resilient is through preparedness – not for every eventuality this is impossible, but at least for the major high severity threats perceived.

In this joint keynote session, Vishal Verma – Vice President, Head of Solution Management, Risk, Compliance & Tax, and Jochen Thierer – Vice President Development, Governance, Risk & Compliance, will share their insights on what risks are on the horizon and should be on your radar. They will also provide an overview of the Governance, Risk, and Compliance & Security trends that are developing and being adopted by organizations worldwide. For technological risks which are increasing in intensity all over the globe, this includes aligning cybersecurity risks with enterprise-wide risk management framework to bridge the proverbial visibility gap and help high-level executives and corporate officers understand the challenges at hand.

Discussion points will include:

- What are the most pressing threats for organizations in the short to medium term?
- What GRC trends are emerging on the market?
- How do these trends impact SAP GRC & Security plans for the future?

Vishal Verma, SAP | Jochen Thierer, SAP

14:15 **How to Detect and Prevent Attacks on SAP Applications**

This session will provide an insight of the successful implementation of SAP Enterprise Threat Detection (ETD) in OMV's SAP landscape. OMV will provide an overview of their experience in using the real-time monitoring solution from SAP (ETD), including insights into the customer experience and how they have been able to use ETD as a 24/7 monitoring service. The speakers will also discuss the benefits they saw and offer their advice in overcoming challenges.

Discussion points will include:

- SAP ETD operational setup
- Benefits seen with this solution
- Lessons learned and tips to plan and run a successful implementation of ETD

Daniel Preiser, OMV | Arndt Lingscheid, SAP

AGENDA

TUESDAY 23 MAY 2023

14:45

Afternoon Networking Refreshment Break

PARTNER MICROFORUM (15:00-15:30) – Achieving Visibility, Detection, and Control of Global SAP Landscapes with New Cybersecurity Standards

Working alongside traditional SAP security like SAP Access and Authorization Management or SAP Patch Management, many of today's customers implement robust cyber security strategies for all SAP landscapes. We outline how cyber security powered by Fortinet can provide visibility, detection, and control for secure SAP landscapes. Listen to the takeaways from this project and get ready to implement cyber security for your SAP Landscapes, too.

- Why SAP landscapes demand a cyber security strategy?
- Which pain points did our customer face?
- Why visibility, detection, and control are important?
- Lessons learned from this SAP Cyber project
- Next steps with SAP ETD

Matthias Czwikla, Fortinet

15:45

Nintendo – A Customer's Journey, For Gaining More Security!

Nintendo has only been using SAP for a few years. Despite a successful introduction in 2018, extensive upgrades were soon necessary. The realisation that IT security had previously been neglected in the SAP environment also led to a rethink. A phase of renewal and implementation of IT security measures followed. Many individual, small steps led to a clear improvement, one may also say: it was a success! This customer story will show what is possible and reduce concerns. As an example of SAP Enterprise Threat Detection, one measure will be presented in more detail.

We will discuss Nintendo's experiences with:

- Nintendo's entry into SAP and its path so far, with a focus on technology and security
- Technology: Classic approach followed by intensive upgrades
- IT security from zero to hero
- A deeper insight into SAP ETD and what has been achieved so far!

Andreas Lang, Nintendo | Martin Müller, SAP

AGENDA

TUESDAY 23 MAY 2023

16:30

Case Study: How Vitens Implemented SAP GRC Access Control in an SAP & Non-SAP Hybrid Cloud Landscape with Joiner, Mover and Leaver Processes, Including IAG as Bridge

Attend this session to hear how Vitens, the largest drinking water company in the Netherlands implemented Position Based Access Control and is fully using all 4 submodules, including automated joiner, mover and leaver processes, connections to LDAP, IAG and manual provisioning systems, SOD review, User Access Review, Password Reset, Access Request Management, Firefighter, Ruleset Management and Business Role Management. By attending you will:

- See how Vitens combined HR triggers with GRC business roles using the standard role functionality in combination with HR job key codes
- Gain insight into how Vitens uses SAP GRC and IAG as an IAM system
- See how Vitens has expanded Access Control to Active Directory using the standard LDAP connector
- See how Vitens is expanding Access Control to SAP cloud applications SAP Analytics Cloud, C4C, SAP Field Service Management, SAP
- Employee Central Payroll and BTP using IAG as bridge
- See how Vitens has expanded Access Control to SuccesFactors using it as a source and target system
- See how Vitens is expanding SuccesFactors to (Azure) Active Directory to support Identity Lifecycle Management
- Hear how Business Role Management is being used in the role management process
- See how Vitens uses the standard Access Request app in FIORI
- Gain insight into how Vitens streamlines SAP license management
- Gain insight into how Vitens implemented vulnerability management

Virgil Verloop, Vitens | Hendrik Bijma, Vitens

17:05

PANEL – Enterprise Risk at the Intersection of Control, Compliance, Audit and Cybersecurity

Our panelists will discuss their key considerations for creating an effective risk management framework, such as:

- Are internal controls designed effectively to mitigate risks related to errors, abuse of resources, non-compliance, and IT security concerns?
- Are we including risks that internal audit identifying is raising?
- Do we have a robust cybersecurity program including emerging cyber threats?
- Do we measure how effective are our cybersecurity and data protection measures to mitigate cyber risk?

Learn from our panelists about potential pitfalls and oversights to be aware of. Understand the key ingredients to achieve success when managing enterprise risk. Ask your own questions to this panel of experts and hear their views. Stay up to date on these topics and continuously assess and improve your risk management program at the intersection of internal control, compliance, audit and cybersecurity to ensure you are effectively managing your risks

Anna Otto, SAP | Shiva Agrawal, Equinor | Sven Gratwohl, ZF Friedrichshafen AG | Andreas Lang, Nintendo | Guillermo Casado, Kerry Group | Marie-Luise Wagener, SAP

17:35

Day One Wrap Up

Anna Otto, SAP | Vincent Doux, SAP

17:45 – 18:45

Evening Networking Reception

Following the last session of the conference, join us at our onsite networking reception to absorb the day's learnings and connect with other attendees over a wind-down drink.

AGENDA

WEDNESDAY 24 MAY 2023

08:15	Registration and Refreshments
08:45	Chairperson's Welcome Back & Intro to Day Two Anna Otto, SAP Vincent Doux, SAP
09:00	Security and Trust in the Cloud This brief presentation introduces SAP's approach to security and the main pillars that support our strategy, which includes providing our customers with trusted cloud operations. It is intended to be a high-level discussion for decision makers and other interested parties who are not security experts. This session will cover: <ol style="list-style-type: none">1. Why SAP Security2. Three Pillars of SAP Security3. Benefits of SAP Cloud Security Approach Jeroen Kroon, SAP
09:30	Probably the Best SAP Protected System in the World This session will provide an insight into Carlsberg's journey, including a deep dive into the implementation process and an overview of the deployed products that keep Carlsberg's business protected. Discussion points include: <ul style="list-style-type: none">• A transparent walkthrough of the customer journey• Implementation experience, stakeholder management and lessons learned• Vulnerability Management, Patch Management, Compliance Management, Threat Management and Security Operations Center integration, Secure Software Development• Opinion after first 6 months of running SAP Security• How to keep SAP Security not a standalone island? Lukasz Brzyski, Carlsberg
10:00	Driving Compliance & Efficiency with Smart RPA Bots Automating SAP GRC Access Controls at Terumo Europe When using SAP GRC Emergency Access Management (EAM), a huge amount of privilege access logs are generated that must be reviewed. As privileged accounts in particular pose a high threat, it is important to carry out quality reviews of the activities of these accounts. Robotics Process Automation (RPA) in combination with SAP GRC Access Controls can be leveraged to perform automated review of these logs which can drastically increase compliance and efficiency. Key take aways from this session include: <ul style="list-style-type: none">• Understand how to build a business case for RPA• Gaining insights into real-world use cases and success stories of RPA implementation in SAP compliance• Robotics Process Automation (RPA) Integration with other applications and tools• Key success factors and lessons learned Pieter Tombeur, Terumo Emea Vikas Bhan, Deloitte
10:30	Morning Refreshments and Networking

AGENDA

WEDNESDAY 24 MAY 2023

PARTNER MICROFORUM (10:45-11:15)

How Automation Increases Visibility and Transparency for ERP related Digital Threats

For industrial companies, the impact of a successful cyberattack on their critical ERP, production and supply chain, or customer portals could be devastating. Cyberattacks targeting the systems that support critical operations such as R&D, financials, and manufacturing are growing in number and severity with the primary goal being industrial espionage. Further, these attacks create business disruptions that potentially cripple operations due to interconnectivity of critical systems. As a result, most nations have developed regulations to reduce the impact of these unfortunate events. Securing your complex ERP landscape doesn't have to be complicated, even with all the advanced threats and attacks out in the wild. That's where Onapsis comes in: join this session to learn how they can support your business against digital threats.

Pedro Perez, Onapsis

11:30

Hybrid Access Management – in the SAP Cloud

Because most system landscapes are moving from on-premise to the cloud, users and authorizations must also be provided in both worlds. Therefore, hybrid access management is needed now more than ever. Using the example of the introduction of the SAP S/4HANA Public Cloud at Adesso SE, we show what hybrid access management can look like and where the pitfalls lie. This session will include:

- Designing the architecture of IAG, IAS and IPS in the cloud
- How to set up the access management in a 3-system-landscape
- Working through the Business Roles in SAP S/4HANA Public Cloud

Hanna Steinhäuser, Adesso SE | Andreas Fritz, Adesso Orange AG

12:00

Highlights and Experiences from the Implementation of SAP Security Access Control in Kerry Group

Last year Kerry Group joined us to share their journey into implementing and evolving the SAP Access Request process. This year, Guillermo Casado returns to share the challenges faced, the requirements analyzed and how Kerry Group implemented SAP GRC into their landscape to reach the set up they have today.

We will discuss Kerry Group's experience with:

- Kerry Group's journey implementing SAP Access Request process
- Transition to SAP GRC Access Control
- Consolidating process with Service Now
- Lessons learned on the way
- Challenges and future objectives

Guillermo Casado, Kerry Group

12:30

Lunch and Networking

AGENDA

WEDNESDAY 24 MAY 2023

PARTNER MICROFORUM (13:00-13:30)

Maximize SAP Access Control: Centralize & Automate SoD Across Multiple Business Apps

Attend this session to learn how SAP Access Violation Management by Pathlock provides value and automation for organizations using SAP Access Control to obtain enterprise-wide user access governance.

This session will allow you to understand the value of selecting an automated monitoring solution to manage Segregation of Duties (SoD). Furthermore, our expert speaker will cover the business benefits of a streamlined, enterprise-wide monitoring approach that efficiently identifies risks due to authorizations and enables effective controls to identify actual user risks.

Learning points:

- Understand the value of integrating business systems real-time to SAP Access Control
- See the functionality offered by SAP Access Violation Management by Pathlock to assist in automating SoD mitigation monitoring
- Learn how customers select the rollout methodology to ensure high user adoption
- Understand the impact of automated controls on internal and external audit activities

Martin De Lange, Pathlock

13:45

SAP Innovation Center Network Initiative for Augmented Access Control: Smart Access Request Recommendations for Simpler and More Secure Access

Join this session to learn about the SAP Innovation Center Network (or ICN) initiative for Augmented Access Control. This SAP innovation program goal is to support end users by leveraging machine intelligence and contextualization to enhance SAP's access control solutions to streamline compliant access to enterprise resources.

Vincent Doux, SAP

14:15

VIRTUAL SESSION

Case Study of Energy Transfer UI Data Protection Masking in SAP S/4HANA

- What is UI Masking and how does it work?
- What are the Masking concepts?
- Role Based Masking
- Attribute Based Masking
- How to identify technical information for sensitive SAP fields
- Reveal on Demand

Masood Ahmed, Energy Transfer

14:50

The Solution Room: Everything You Always Wanted to Ask!

A panel discussion with a difference! Our expert panellists will be answering your questions on how they would recommend to address key enterprise risk and cyber security business challenges. While this format will not allow for individual customer-specific technical advice, it is intended to be an open forum to share questions and ideas on industry benchmarks, lessons learned, business benefits, quick wins, best practices...as well as getting insights on how companies are planning to strengthen risk, control, audit, cyber security and data protection in 2023 and beyond. Throughout the conference, we invite delegates to submit their questions, comments and discussion points in-person and via the event app. These questions will then form the basis of this panel discussion, ensuring that the topics covered are what you want to hear about. Organized as an open format, this is your chance to interact directly with the leaders of the GRC solutions at SAP.

Vincent Doux, SAP | Arndt Lingscheid, SAP | Vishal Verma, SAP | Jochen Thierer, SAP

AGENDA

WEDNESDAY 24 MAY 2023

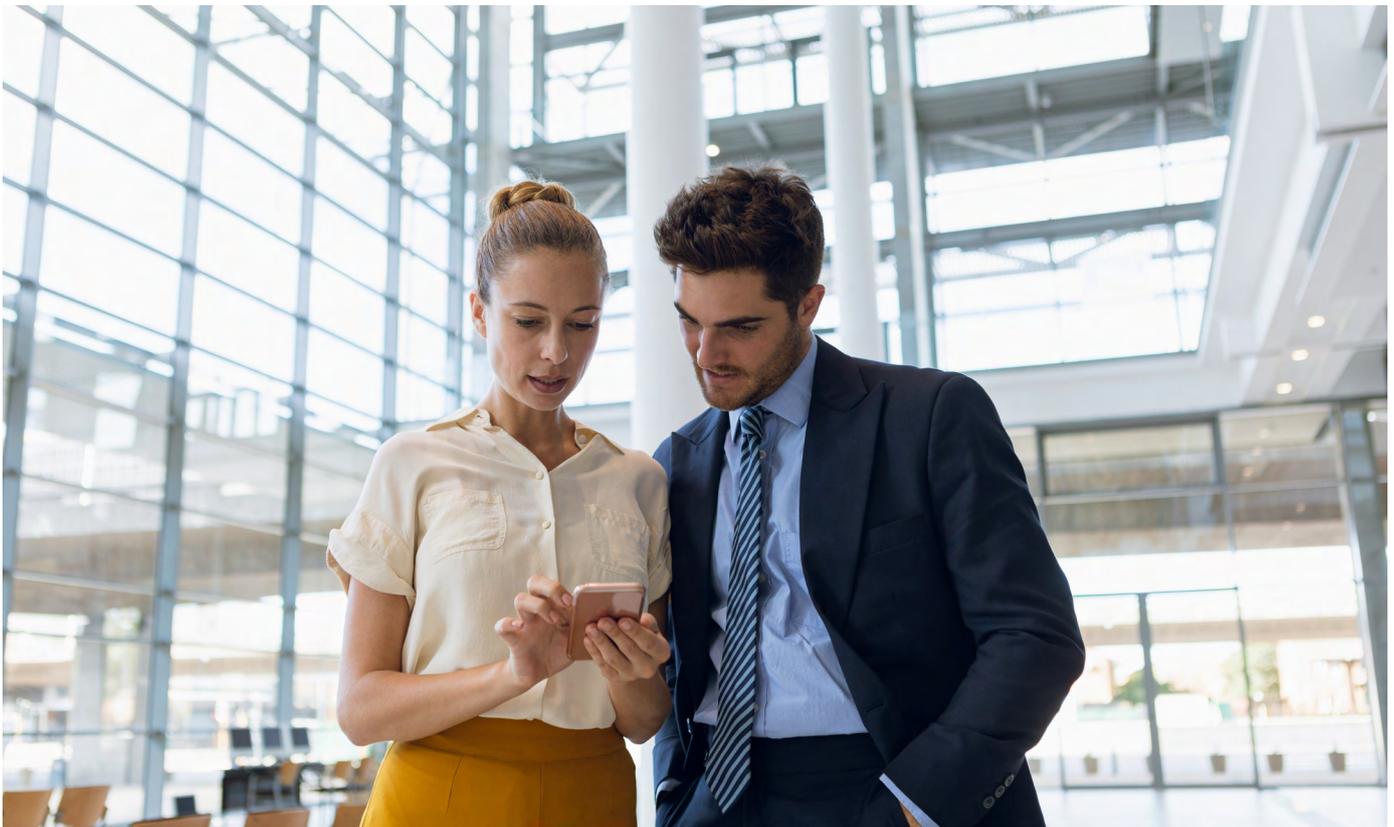

15:20

Smarter Than You!

AI is transforming risk management, enabling organisations to make decisions based on vast amounts of data in seconds. How should AI change the way we approach risk & what are the benefits and challenges that come with these changes.
Chris Johnston, SAP

15:50

Close of Conference

NEW FOR 2023

This year's conference will be co-located with the [International SAP Conference on Internal Controls, Compliance and Risk Management](#).

The two events will be exploring industry synergies with shared keynotes and a combined exhibition allowing extended networking for our attendees and more. As part of your ticket, you will have the opportunity to move freely between both agendas.

GOLD SPONSORS

Deloitte

Deloitte can help you break every boundary and overcome the obstacles that stand between you and your vision for the enterprise. We bring deep industry experience at the intersection of business transformation and technology enablement; a global network of 26,000 SAP-focused professionals; end-to-end transformation capabilities and solutions; and an extensive track record of delivering the outcomes that matter. Discover how Deloitte can help you shatter expectations with the built-to-evolve Kinetic Enterprise, enable constant innovation, and grow.

Fortinet

Fortinet (NASDAQ: FTNT) is a driving force in the evolution of cybersecurity and the convergence of networking and security. Our mission is to secure people, devices, and data everywhere, and today we deliver cybersecurity everywhere you need it with the largest integrated portfolio of over 50 enterprise-grade products. Well over half a million customers trust Fortinet's solutions, which are among the most deployed, most patented, and most validated in the industry. The **Fortinet Training Institute**, one of the largest and broadest training programs in the industry, is dedicated to making cybersecurity training and new career opportunities available to everyone. **FortiGuard Labs**, Fortinet's elite threat intelligence and research organization, develops and utilizes leading-edge machine learning and AI technologies to provide customers with timely and consistently top-rated protection and actionable threat intelligence.

For more information, please visit: fortinet.com

Onapsis

Onapsis Description: Onapsis protects the business-critical applications that power the global economy including ERP, CRM, PLM, HCM, SCM and BI applications from SAP®, Oracle® and leading SaaS providers. Onapsis proudly serves more than 300 of the world's leading brands including 20% of the Fortune 100 and partners with leading consulting and audit firms such as Accenture, Deloitte, IBM, PwC and Verizon. The Onapsis Research Labs is responsible for the discovery and mitigation of more than 800 zero-day business-critical application vulnerabilities.

GOLD SPONSORS

Pathlock

Pathlock brings simplicity to customers who are facing the security, risk, and compliance complexities of a digitally transformed organization. New applications, new threats, and new compliance requirements have outpaced disparate, legacy solutions. Pathlock provides a single platform to unify access governance, automate audit and compliance processes, and fortify application security. With the industry's broadest support for business applications, Pathlock customers can confidently handle the security and compliance requirements in their core ERP and beyond.

Whether it's minimizing risk exposure and improving threat detection, handling SoD with ease, or unlocking IAM process efficiencies – Pathlock provides the fastest path towards strengthening your ERP security & compliance posture.

For more information, please visit: pathlock.com

SILVER SPONSORS

BigID

BigID is a leader in data security, privacy, compliance, and governance: enabling organizations to proactively discover, manage, protect, and get more value from their data in a single platform for data visibility and control. Customers use BigID to reduce their data risk, automate security and privacy controls, achieve compliance, and understand their data across their entire data landscape: including multicloud, hybrid cloud, IaaS, PaaS, SaaS, and on-prem data sources.

BigID has been recognized by CNBC as one of the top 25 startups for the enterprise, has been named to the Inc 5000 and Deloitte 500 for two years in a row, and is the leading modern data security vendor in the market today.

BigID uses advanced machine learning and data intelligence to help enterprises better manage and protect their customer & sensitive data, meet data privacy and protection regulations, and leverage unmatched coverage for all data across all data stores.

For more information, please visit: bigid.com

SILVER SPONSORS

Turnkey Consulting

Turnkey Consulting is helping to make the world a safer place to do business by specialising its expertise across Integrated Risk Management, Identity and Access Management, and Cyber and Application Security. We provide business advisory, consulting, technology implementation and managed services to help customers safeguard their application environments - protecting critical ERPs (such as SAP, Oracle and MS Dynamics) and wider enterprise systems.
