

Dr. Anja Meyer is a senior lecturer in the School of Anatomical Sciences, University of the Witwatersrand. She has over 15 years of experience in the fields of Human and Comparative Skeletal Biology, Bioarchaeology, Palaeopathology, Forensic Archaeology and Forensic Anthropology. As a trained Forensic Archaeologist, she also frequently assists with scene assessment and the excavation and retrieval of buried human remains. She also assists with forensic casework analyses of unidentified human remains. She is a member of the Association of Southern African Professional Archaeologists, the South African Archaeological Society, the Society of Africanist Archaeologists, the International Association of Craniofacial Identification, the Commonwealth Association of Museums, and the Anatomical Society of Southern Africa. She is currently the Forensic Anthropology Interest Group representative for ASSA. Her research focuses mainly on Southern African Bioarchaeology, Palaeopathology and Forensic Anthropology.
