

Ms. Jessica Garlick is currently a Master's student in the Division of Clinical Anatomy and Biological Anthropology, Department of Human Biology, Faculty of Health Sciences at the University of Cape Town. Before this, she completed her BSc in Biochemistry and Human Anatomy and Physiology as well as her Honours in Clinical Anatomy at the University of Cape Town. She has a keen interest in Neuro-anatomy and her current research is looking at variations in the *circulus arteriosus cerebri* and whether these variations potentially predispose people to aneurysm development.
