

James T. Pokines is an Associate Professor in the Forensic Anthropology Program, Department of Anatomy and Neurobiology, Boston University School of Medicine. He is also the Forensic Anthropologist for the Office of the Chief Medical Examiner, Boston, and analyses all unknown bone cases in Massachusetts. His prior experience includes twelve years as a Forensic Anthropologist and Manager at the Central Identification Laboratory, Hawaii, recovering and analysing the remains of missing servicemembers from past conflicts. His field experience includes excavations in 18 countries, including modern forensic scenes in multiple countries, and has ongoing research in Jordan. His taphonomic interests include scavenger gnawing and dispersal, subaerial weathering, and other environmental effects to bone, and he also researches zooarchaeology, paleoecology, and Paleolithic archaeology. He received his B.A. degree in Anthropology and Archaeology at Cornell University and his M.A. and Ph.D. degrees in Anthropology from the University of Chicago and is a former Vice President of the American Board of Forensic Anthropology and a current Fellow of the American Academy of Forensic Sciences. His recent publications include Manual of Forensic Taphonomy, second edition.
