

Marion Laudette

Dr Marion Laudette earned her PhD in Physiology and Pharmacology at the Institute of Metabolic and Cardiovascular Diseases in Toulouse, France in 2019, receiving recognition from the Academy of Sciences of Toulouse. Her research focused on mitochondrial biology and signaling pathways in heart failure. In 2019, she began her postdoctoral fellowship in Professor Jan Borén´s lab at the University of Gothenburg, Sweden. Since 2024, she is a researcher at the Wallenberg Laboratory, continuing her work on mitochondrial health in the heart. She is funded by the Swedish Heart-Lung Foundation.
