

**Panagiota-Efstathia Nikolaou**

Panagiota Efstathia (Naya) Nikolaou currently serves as a basic and translational researcher at the Laboratory of Pharmacology, School of Pharmacy and the Department of Clinical Therapeutics, Medical School of the National and Kapodistrian University of Athens, Greece. Her research is primarily focused on elucidating the mechanisms of myocardial injury associated with acute myocardial infarction and heart failure, with a particular emphasis on developing novel cardioprotective strategies. Additionally, she investigates cardiotoxicity pathways, contributing to advancements in the field of cardio-immunology and cardiac amyloidosis research.
