

# ICMR 2025 - Springer Nature Workshop

## How to prepare a successful paper

### Description:

Join us for an engaging and interactive author workshop tailored specifically for PhD candidates and early career researchers!

This workshop will equip you with valuable strategies and practical insights to enhance the success of your journal submissions while managing publication-related stress effectively.

### What you'll gain:

- Mastering manuscript preparation and publication strategies
- Navigating the peer review process with confidence
- Understanding ethical considerations in academic publishing
- Leveraging Open Access to maximize your impact
- Boosting visibility and influence in your research field

Through a mix of presentations, discussions, and hands-on activities, you'll develop the skills needed to navigate academic publishing with greater ease and assurance.

**Facilitator:** Dr. Mustafa Hasanov, Publisher, Engineering & Applied Sciences, Springer Nature.

Mustafa Hasanov, also known by the mononym Mufty, is a publishing editor at Springer Nature, specializing in Engineering and Applied Sciences. In this role, he manages a diverse portfolio of academic journals, including [Fire Technology](#), [Multiscale and Multidisciplinary Modeling](#), [Experiments and Design](#), [International Journal on Interactive Design and Manufacturing](#), [Advanced Modeling and Simulation in Engineering Sciences](#), [Meccanica](#), among others.

Before transitioning to research publishing, Dr Hasanov held positions as a project manager and researcher at various Dutch universities. He earned his PhD in Spatial Sciences from the University of Groningen in 2021, through the Faculty of Spatial Sciences. With a background spanning both academia and publishing, Mustafa brings valuable insights that resonate with authors, reviewers, editors, and industry professionals alike.
