

UK astronomy at the La Palma observatory: a new generation of facilities and instruments Schedule

Talks

Thursday 09h00-10h30

09h00: From WEAVE to HARPS3 and beyond: The ING as a Global Spectroscopic Survey Facility for the Next Decade (Rubén Sánchez-Janssen)

09h15: First results from the WEAVE Cluster Survey: galaxy environments from cluster cores to cosmic web (Callum O'Kane)

09h30: Pathway to First Light of HARPS3 at the Isaac Newton Telescope (online) (René Tronsgaard)

09h45: On-sky rapid prototyping of the Squash spectrograph (Beth Garton)

10h00: Enabling Time Domain Astronomy on La Palma with GOTO (Ben Godson)

10h15: The Digital Telescope Prototype (James McCormac)

Posters

- A dual-site perspective on UK astronomy in the Canary Islands: the role of Teide Observatory (Mike Peel)
- Light Curve and Phase Curve Analysis of Selected Asteroids from Serendipitous Observations (Shirley Aoko)
