

## **Magnetic Connectivity and Coronal Waves: From Chromosphere to Solar Wind Schedule**

### **Talks**

#### **Friday 14h15-15h45**

14h15: Interactions between fast Down-flows and Fan-shaped Jets above a Penumbral Light Bridge using the Goode Solar Telescope (Kristina Brocklebank)

14h35: Modelling Small-Scale Torsional Alfvén Waves in Coronal Loops (Samuel Skirvin)

14h55: Fast Magnetoacoustic Wave Behavior within Gravitationally Stratified, Magnetically Inhomogeneous Media (Ryan Smith)

15h15: Solar Wind Turbulence Properties and its Connection to Source Regions: Coronal Holes vs Active Regions. (Jeffersson Andres Agudelo Rueda)

### **Posters**

- Spatially Coherent and Intermittent Alfvénic Fluctuations in Polar Spicules (Edris Tajfirouzeh)
