

Overview

We are pleased to announce and invite you to participate in The 16th Royal Marsden Head and Neck Conference, themed "Oropharyngeal Cancer"

After the success of the 15th meeting and subsequent feedback, it was evident that the rapidity of advances in cancer care required a similar theme to be repeated annually.

This year, we will focus on oropharyngeal cancer, which has seen an explosion in the evidence base. This meeting will synthesise the evidence in this space, in the domains of diagnostics, surgical and oncological management, rehabilitation and follow up, harnessing technological advances. The participants will leave the meeting with clear concepts on current management and ongoing research that's likely to change practice.

Our invitation is extended to medical, nursing and allied health and members of the multidisciplinary team, and to those based in the primary, secondary or tertiary care setting.

TOPICS TO INCLUDE:

- **Approaches to Early Diagnosis of Primary and Recurrent Cancers**
- **Radiology and Liquid Biopsy**
- **Minimally Invasive Surgical Approaches: Case Selection, Evidence Base, New Platforms, Ongoing Trials**
- **Radical and Adjuvant Radiation: Case Selection, De-escalation Regimes, Ongoing Trials**
- **Survivorship Issues in Oropharyngeal Cancer**

We look forward to you all joining us in November 2025.

Professor Vin Paleri
Professor for Head & Neck Surgery
Director of IReC
The Royal Marsden NHS FT
