

## Dr David Fredericks

Dr David Fredericks is an Emergency and Critical Care Physician currently working in the Division of Critical Care at Groote Schuur Hospital in Cape Town.

Dr Fredericks specific areas of interests are in Advanced Airway, Mechanical Ventilation, Toxicology and Ultrasound.

He is currently the Secretary of the Emergency Medicine Council and the EM representative on the intercollegiate board of Critical Care in South Africa.

Dr Fredericks is a dad of 2 budding superstars, and a die hard Liverpool football supporter. He enjoys watching a good psychological thriller (with a decent single malt) in my spare time.
