

Ari Medecky

Vice President of Project Management Make-A-Wish® Southern Nevada

Born in South America and raised in California, Ari brings over twenty years of experience in social services to her current role as VP of Project Management for Make-A-Wish Southern Nevada.

Bilingual in English and Spanish, she has spent her time in Las Vegas applying her passion towards helping children and families through both intervention and advocacy. Her achievements in workplace diversity and inclusion as well as her knowledge of government policy allowed her the opportunity to work for the US Department of Commerce during the 2020 US Census and aided in one of the highest response rates to historically underreported communities in Las Vegas.

A lover of animals as well as devotee to fashion, she has volunteered for Dress for Success as well as local animal rescues. By combining both her expertise in community outreach throughout Las Vegas with her experience in change process and procedure management, she is working to ensure that children fighting critical illnesses continue to receive hope through the granting of their one true wish!
